Vietnam Studies - Sharpening The Combat Edge: The Use Of Analysis To Reinforce Military Judgment [Illustrated Edition] Lieutenant General Julian J. Ewell, 2014-08-15 Includes 26 charts 4 maps 31 tables and 48 illustrations This monograph focuses on the use of analysis in combat operations and concentrates on the utilization of techniques in situations with which the authors were personally familiar It covers primarily the systematic blending of military judgment data collection and simple problem solving techniques as utilized in the 9th Infantry Division and II Field Force Vietnam in 1968 1969 and 1970 The approach is rather tentative because it was not possible in many cases to determine exactly what factors made the operations go so well Rather we have laid out the most important and interesting factors in the hopes that the readers will be stimulated and perhaps decide for themselves what the critical points were Fortunately a large amount of basic data was available to support the manuscript On the other hand some basic data has been lost In these cases we drew on memory and tried to double check the accuracy of our recollections We think any general statements are reasonably accurate The analytic approach when tried on the battlefield seemed to help produce sizable increases in both overall performance and efficiency Whether these improvements were due more to good basic concepts or to good execution or both is difficult to determine We can say that first class officers and first class soldiers are capable of outstanding battlefield performance To list the thousands of people who contributed to this tremendous team effort would be impossible However the monograph is dedicated to all those members of the 9th Infantry Division and of II Field Force Vietnam who acquitted

Russell,2007-04-09 This book critically examines the weaknesses of American intelligence led by the Central Intelligence Agency in informing presidential decision making on issues of war and peace It evaluates the CIA s strategic intelligence performance during the Cold War and post

Cold War periods as a foundation for examining the root causes of intelligence failures surrounding the September 11th attacks and assessments of Iraq's weapons of mass destruction programs in the run up to the Iraq War. The book probes these intelligence failures which lie in the CIA's poor human intelligence collection and analysis practices. The book argues that none of the post 9/11 intelligence reforms have squarely addressed these root causes of strategic intelligence failure and it recommends measures for redressing these dangerous vulnerabilities in American security.
