Louis Jacobs and the Quest for a Contemporary Jewish Theology Miri Freud-Kandel, 2023-10-15 For Louis Jacobs the quest the process of engaging with and thinking about Jewish faith was a lifelong pursuit He offered a model in the 1960s a period characterized by general religious crisis of an observant committed but intellectually curious Judaism that empowered individual seekers to address challenges to faith In Orthodox Judaism at the time a battle was under way for religious control Generating a widespread controversy in British Jewry known as the Jacobs Affair his thought offers a lens for examining the trajectory of Orthodoxy In a contemporary context marked by the changing cultural and intellectual concerns of a post secular age the focus of some of these debates over religious control has shifted Yet Jacobs emphasis on a personal quest is as relevant as ever perhaps more so This first book length analysis of his theology unpacks the building blocks of his thought It argues that despite its particularities and limitations his approach can provide a powerful model for contemporary religious seekers in the context of a growing impetus away from established denominationally bound forms of religion Many orthodox believers across a range of faiths continue to prefer the certainty of unquestionable religious truth claims rather than pursuing a subjective search for religious meaning For those seeking alternative models for the

Communication in Non-Human Animals Ulrike Griebel, D. Kimbrough Oller, Irene M. Pepperberg, 2024-06-13 Human language is unique among animals. We assume that complex cognitive capacities in general and language in particular evolved gradually and thus are manifest in different kinds and/or degrees in other animals demonstrating social communication. This assumption is supported by the fact that we can train social species from very different groups of animals e.g. great apes, dolphins, dogs, parrots to understand and in several cases even use abstract symbols for communication with humans and conspecifics. Even simple grammatical rules for sequences of 2-3 symbols can be trained to be understood by several species e.g. great apes, dogs, dolphins. Even though human language training in these species takes considerable time and effort, it convinces us that cognitive foundations for language are present in other species and given the relevant selection pressures, symbolic communication could evolve in other species. **PC Mag**, 1989-01-31 PCMag.com is a leading authority on technology delivering Labs-based independent reviews of the latest products and services.
