Smart and Intelligent Systems Abbas Moallem, 2021-12-28 The more we know about smart and intelligent systems and their use, the more productive organizations can become and the more quality of life will improve. Gavriel Salvendy, President, Academy of Science, Engineering, and Medicine of Florida University. Distinguished Professor, University of Central Florida. Robots, drones, self-driving cars, and personal assistants are only some of the intelligent and smart systems which are populating our world and changing the way we use technology to carry out our everyday activities, bringing about both exciting opportunities for human-technology symbiosis as well as compelling design and development challenges. Through a carefully selected choice of chapters authored by top scientists in the field, this book edited by Abbas Moallem sheds light on fundamental aspects of intelligent and smart systems, investigating the role and impact of affective and psychophysiological computing, machine learning, cybersecurity, agent transparency, and human-agent teaming in the shaping of this new interaction paradigm, as well as the human factors involved in their application in critical domains such as health, education, and manufacturing in the emerging technological landscape. Constantine Stephanidis, Professor of Computer Science, University of Crete. Distinguished member of Foundation for Research and Technology Hellas (FORTH). In today's digital world, the words smart and intelligent are now used to label devices, machinery, systems, and even environments. What is a smart system? Is smart synonymous with intelligent? If not, what does an intelligent system mean? Are all smart systems intelligent? This book tries to answer these questions by summarizing the existing research in various areas.
