Limpopo Application Form 2015:

Financial inclusion Munacinga C. Simatele, 2022-02-15 Financial inclusion has been noted as a key driver of poverty alleviation and growth Yet most of the scholarly work that exists lacks a comprehensive discussion of how the poor interact with financial services and the channels through which such services can affect their livelihoods This book offers researchers who focus on financial inclusion and African economies a one stop resource for understanding the channels of transmission for financial inclusion as well as an application of these channels through original country specific empirical papers The book provides a back to basics presentation of the transmission of financial services to growth and poverty This theoretical discussion is complemented by an empirical presentation of the various services used by the poor with a focus on Africa Case studies of financial inclusion in six African countries cover a broad range of topics most important to African countries and highlight the unique African setting These empirical papers provide important learning points Firstly hybrid financial institutions such as cooperative financial institutions and financial social entrepreneurs are the best way to increase financial inclusion in Africa They provide important vehicles to circumvent the restrictive and exclusive bank based financial markets typical of African economies Secondly digital finance is a potent tool for improving financial access and usage in Africa and its impact on poverty operates through both traditional and nontraditional financial instruments Thirdly investment in infrastructure which supports complementary markets is critical and is likely to have a greater effect on credit rationing than direct provision of credit to small businesses

Handbook of Quality of Life in African Societies Irma Eloff, 2019-08-09 This handbook reflects on quality of life in societies on the continent of Africa. It provides a widely interdisciplinary text with insights on quality of life from a variety of scientific perspectives. The handbook is structured into sections covering themes of social context, culture, and community, the environment, and technology, health, education, and family. It is aimed at scholars who are working towards sustainable development at the intersections of multiple scientific fields, and it provides measures of both objective and subjective quality of life. The scholarly contributions in the text are based on original research and it spans fields of research such as cultures of positivity, wellbeing, literacy, and multilingualism, digital and mobile technologies, economic growth, food and nutrition, health promotion, community development, teacher education, and family life. Some chapters take a broad approach and report on research findings involving thousands and in one case millions of participants. Other chapters zoom in and illustrate the importance of specificity in quality of life studies. Collectively, the handbook illuminates the particularity of quality of life in Africa, the unique contextual challenges, and the resourcefulness with which challenges are being mediated. This handbook provides empirically grounded conceptualizations about life in Africa that also encapsulate the dynamic, ingenious ways in which we as Africans enhance our quality of life.

Biology of Composts Mukesh K. Meghvansi, Ajit Varma, 2020-04-09 This book highlights the latest findings on fundamental aspects of composting, the interaction of various microorganisms, and the underlying mechanisms. In addition to addressing modern tools and techniques used for composting research, it provides an overview of potential composting applications in both agriculture and environmental reclamation. Composting is the process of organic waste decomposition mediated by microorganisms. The end product is called compost and can be used as a supplement to improve soil fertility. As

the municipal waste generated in most developing countries contains a substantial amount of organic matter suitable for composting this technology offers a win win opportunity for stakeholders in terms of disposing of organic waste and providing organic fertilizers for agriculture In addition using compost reduces the dependency on harmful chemical fertilizers and represents a sustainable and environmentally friendly alternative

Speed Breeding Systems For Food

Kenny Paul,Nagesh Kancharla,Kshipra Gautam ,Marina Ceran,2024-10-17 Speed breeding systems for sustainable food production offer a promising solution to address food security and environmental sustainability Speed breeding technologies allow accelerating generation of new plant varieties with desired traits in a short period These systems include genetic selection vertical hydroponics and data driven smart sensor applications Quick generation of plant varieties is achieved by manipulating photoperiods of a native plant with extended light periods in a controlled environment to fasten the crop cycle This allows for multiple plant generations to be grown and harvested in a single year rather than the typical one to two generations in traditional field based breeding The application of molecular markers in the analysis of crop genomes enables the identification and characterization of genetic variation within a crop species This in turn helps breeders in identifying and selecting plants with desirable traits such as resistance to pests or diseases or improved yield Marker assisted selection MAS and genomic selection GS are two recent methods that revolutionized plant breeding to improve the efficiency and accuracy of selecting desirable traits MAS allows breeders to identify desirable traits earlier in the breeding process without having to wait for the traits to be phenotypically expressed On the other hand GS allows breeders to predict the performance of a plant before it is even grown and can help speed up the breeding process by allowing breeders to select plants with desirable traits much earlier in the breeding process

***Transforming Ethnomusicology Volume II* Beverley**

Diamond,Salwa El-Shawan Castelo-Branco,2021-03-09 For decades ethnomusicologists across the world have considered how to effect positive change for the communities they work with when faced with challenging social political and environmental issues and institutional structures The two volume collection Transforming Ethnomusicology aims to deepen

and broaden dialogues about social engagement within the discipline of ethnomusicology. Its many voices from scholars and practitioners from diverse backgrounds and working in a variety of cultural situations explore how ethnomusicology can transform the world by contributing to social change. Through their illuminating case studies and reflections they at the same time transform how we understand ethnomusicology as a discipline. The second volume of *Transforming Ethnomusicology* provides much needed new examinations of social and ecological concerns and centers around the recognition that colonial and environmental damages are intertwined and grounded in the failure to respect the land and its peoples. Featuring Indigenous perspectives from America, Australia, and South Africa, this volume critically engages with the question how ethnomusicologists can support marginalized communities in sustaining their musical knowledges and threatened geographies within institutional and historically grown structures that have long worked toward their destruction. The volume ends with a radical model for change that is based on a profound rethinking of established structures of knowledge.
