**Wtf? Where's the Fraud?** Larry Benson, Andy Bucholz, 2015-12-27 WTF Where's the Fraud How to Unmask and Stop Identity Fraud's Drain on Our Government reveals the true epidemic facing our nation the profiles of its perpetrators and the devastating cost of this multi billion dollar industry Larry Benson and Andy Bucholz marshal their experiences at LexisNexis Risk Solutions as researchers and developers of solutions for identity theft and fraud WTF Where's the Fraud explains identity fraud and answers the questions Why should I care and How much does it cost us It reveals the information gold mine that perpetrators already know about and take advantage of It sheds light on the growing insecurity of the government's benefits administration and points to the emerging problems of fraud in health care This book gives both government and citizen alike a leg up against an unwieldy and adaptive enemy In a time when social media pervades popular culture and ubiquitous devices provide easy access to personal information identity fraud has emerged as a national epidemic **Where Histories Reside** Priya Jaikumar, 2019-10-31 In Where Histories Reside Priya Jaikumar examines eight decades of films shot on location in India to show how attending to filmed space reveals alternative timelines and histories of cinema In this bold spatial film historiography Jaikumar outlines factors that shape India's filmed space from state bureaucracies and commercial infrastructures to aesthetic styles and neoliberal policies Whether discussing how educational shorts from Britain and India transform natural landscapes into instructional lessons or how Jean Renoir's *The River* 1951 presents a universal human condition through the particularities of place Jaikumar demonstrates that the history of filming a location has always been a history of competing assumptions experiences practices and representational regimes In so doing she reveals that addressing the persistent question of what is cinema must account for an aesthetics and politics of space **Lost in Work** Amelia Horgan, 2021-06-20 Evening Standard's best non fiction 2021 A brilliant searing exposé of the lies underpinning work Owen Jones Work hard get paid It's simple Self evident But it's also a lie at least for most of us For people today the old assumptions are crumbling hard work in school no longer guarantees a secure well paying job in the future Far from a gateway to riches and fulfilment work means precarity anxiety and alienation Amelia Horgan poses three big questions what is work How does it harm us And what can we do about it While abolishing work altogether is not the answer Lost in Work shows that when we are able to take control of our workplaces we become less miserable and can work towards the transformative goal of experimenting with work as we know it *From What Is to What If* Rob Hopkins, 2019-10-15 Big ideas that just might save the world The Guardian The founder of the international Transition Towns movement asks why true creative positive thinking is in decline asserts that it's more important now than ever and suggests ways our communities can revive and reclaim it In these times of deep division and deeper despair if there is a consensus about anything in the world it is that the future is going to be awful There is an epidemic of loneliness an epidemic of anxiety a mental health crisis of vast proportions especially among young people There's a rise in extremist movements and

governments Catastrophic climate change Biodiversity loss Food insecurity The fracturing of ecosystems and communities beyond it seems repair The future to say nothing of the present looks grim But as Transition movement cofounder Rob Hopkins tells us there is plenty of evidence that things can change and cultures can change rapidly dramatically and unexpectedly for the better He has seen it happen around the world and in his own town of Totnes England where the community is becoming its own housing developer energy company enterprise incubator and local food network with cascading benefits to the community that extend far beyond the projects themselves We do have the capability to effect dramatic change Hopkins argues but we're failing because we've largely allowed our most critical tool to languish human imagination As defined by social reformer John Dewey imagination is the ability to look at things as if they could be otherwise The ability that is to ask What if And if there was ever a time when we needed that ability it is now Imagination is central to empathy to creating better lives to envisioning and then enacting a positive future Yet imagination is also demonstrably in decline at precisely the moment when we need it most In this passionate exploration Hopkins asks why imagination is in decline and what we must do to revive and reclaim it Once we do there is no end to what we might accomplish From What Is to What If is a call to action to reclaim and unleash our collective imagination told through the stories of individuals and communities around the world who are doing it now as we speak and witnessing often rapid and dramatic change for the better

**Revealing Schemes** Scott Radnitz, 2021-05-18 Conspiracy theories are not just outlandish ideas They can also be political weapons Conspiracy theories have come to play an increasingly prominent role in political systems around the world In *Revealing Schemes* Scott Radnitz moves beyond psychological explanations for why people believe conspiracy theories to explore the politics surrounding them placing two questions at the center of his account What leads regimes to promote conspiracy claims And what effects do those claims have on politics and society Focusing on the former Soviet Union a region of the world where such theories have long thrived he shows that incumbent politicians tend to make conspiracy claims to demonstrate their knowledge and authority at moments of uncertainty and threat They emerge more often where there is serious political competition rather than unbridled autocracy and in response to events that challenge a regime's ability to rule Yet conspiracy theories can also be habit forming and persist as part of an official narrative even where immediate threats have subsided a strategy intended to strengthen regimes but that may inadvertently undermine them *Revealing Schemes* explores the causes consequences and contradictions of conspiracism in politics with an original collection of over 1 500 conspiracy claims from across the post Soviet region two national surveys and 12 focus groups At a time of heightened distrust in democratic institutions and rising illiberal populism around the world understanding how conspiracy theories operate in a region where democracy came late or never arrived can be instructive for concerned citizens everywhere

*Sick Schools* David V. Anderson, 2020-01-10 Who's afraid of for-profit education Those who work in non-profit or government owned and operated schools Many parents and other stakeholders have been made fearful by this education

establishment What's more important to humans nutrition or education Nutrition is more important because it is the prerequisite for other human activities including education What organizations provide food and who pays for the food Food is provided by for profit farmers for profit processors for profit wholesalers and for profit retailers Most food is purchased with the consumers own money but a significant amount is purchased by low income individuals using food stamps Why can't education be provided similarly using education stamps We trust for profit enterprises to provide our food Why can't we trust for profit enterprises to provide K 12 education Fearmongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education Go to the supermarket and ponder its marvelous array of foods and then contemplate how a for profit K 12 education sector would please and amaze its customers [The Innocence of Pontius Pilate](#) David Lloyd Dusenbury,2021-12-01 The gospels and ancient historians agree Jesus was sentenced to death by Pontius Pilate the Roman imperial prefect in Jerusalem To this day Christians of all churches confess that Jesus died under Pontius Pilate But what exactly does that mean Within decades of Jesus death Christians began suggesting that it was the Judaeen authorities who had crucified Jesus a notion later echoed in the Qur'an In the third century one philosopher raised the notion that although Pilate had condemned Jesus he'd done so justly this idea survives in one of the main strands of modern New Testament criticism So what is the truth of the matter And what is the history of that truth David Lloyd Dusenbury reveals Pilate's innocence as not only a neglected theological question but a recurring theme in the history of European political thought He argues that Jesus interrogation by Pilate and Augustine of Hippo's North African sermon on that trial led to the concept of secularity and the logic of tolerance emerging in early modern Europe Without the Roman trial of Jesus and the arguments over Pilate's innocence the history of empire from the first century to the twenty first would have been radically different **Handbook of Research on Distribution Channels** Charles A. *Conspiracy Theories in the Time of Covid-19* Clare Birchall,Peter Knight,2022-11-04 Conspiracy Theories in the Time of Covid 19 provides a wide ranging analysis of the emergence and development of conspiracy theories during the Covid 19 pandemic with a focus on the US and the UK The book combines digital methods analysis of large datasets assembled from social media with politically and culturally contextualised close readings informed by cultural studies In contrast to other studies which often have an alarmist take on the infodemic it places Covid 19 conspiracy theories in a longer historical

perspective It also argues against the tendency to view conspiracy theories as merely evidence of a fringe or pathological way of thinking Instead the starting assumption is that conspiracy theories including Covid 19 conspiracy theories often reflect genuine and legitimate concerns even if their factual claims are wide of the mark The authors examine the nature and origins of the conspiracy theories that have emerged the identity and rationale of those drawn to Covid 19 conspiracism how these conspiracy theories fit within the wider political economic and technological landscape of the online information environment and proposed interventions from social media platforms and regulatory agencies This book will appeal to anyone interested in conspiracy theories misinformation culture wars social media and contemporary society The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY 4.0 license

Precarious Passages Tuire Valkeakari, 2022-06-28 Precarious Passages unites literature written by members of the far flung Black Anglophone diaspora Rather than categorizing novels as simply African American Black Canadian Black British or postcolonial African Caribbean this book takes an integrative approach it argues that fiction creates and sustains a sense of a wider African diasporic community in the Western world Tuire Valkeakari analyzes the writing of Toni Morrison Caryl Phillips Lawrence Hill and other contemporary novelists of African descent She shows how their novels connect with each other and with defining moments in the transatlantic experience most notably the Middle Passage and enslavement The lives of their characters are marked by migration and displacement Their protagonists yearn to experience fulfilling human connection in a place they can call home Portraying strategies of survival adaptation and resistance across the limitless varieties of life experiences in the diaspora these novelists continually reimagine what it means to share a Black diasporic identity

*The Political Economy of Electricity* Mark Cooper, 2017-04-24 Providing critical insights that will interest readers ranging from economists to environmentalists policymakers and politicians this book analyzes the economics and technology trends involved in the dilemma of decarbonization and addresses why aggressive policy is required in a capitalist political economy to create a sea change away from fossil fuels The environmental damage across the globe is a result of the success of capitalist industrialism 250 years of carbon pollution resulting from consumption of fossil fuels to drive the economy and the worldwide aspiration to

ever increasing levels of economic development But capitalism has also produced the tools to solve the problems it has created in the form of a technological revolution in low carbon renewables distributed resources and intelligent systems to integrate supply and demand This book comprehensively examines the political economy of electricity and analyzes the challenge of transforming today s electricity sector to meet the dual goals of decarbonization and development expressed in the Paris Agreement Author Mark Cooper defines the dilemma of development and decarbonization as the great challenge facing the electricity industry and documents how the economic resources costs of a 100 percent renewable portfolio has declined to the point that decarbonization can pay for itself making the low carbon renewable technologies that enable desired environmental and public health benefits an easy sell He identifies the substantial benefit of increasing use of information communications and advanced control technologies shows how targeted innovation could speed the transition by a decade or two and lower the overall cost of the transition by as much as half and explains why the flexible multi stakeholder approach of the Paris Agreement is the correct approach      **Sustainable Aviation Fuels** Michael P.
