- The current produced by a generator is (direct, alternating) current.
- A motor (uses, creates) an electric current as it turns.
- A device that increases or decreases voltage of electric current passing through a power line is a (transformer, motor).
- If the secondary coil of a transformer has more turns than the primary coil, the transformer is a (step-up, step-down) transformer.

Directions: In the space below, draw a sketch of a step-down transformer that has half as many coils in the secondary coil as in its primary coil. Label the two coils.

seconds to months The power balance and frequency stability in a network with increasing inputs from variable sources and the technical and economic implications of increased penetration from such sources with special reference to demand side management The conversion of energy into electricity from RE sources and the type and characteristics of generators used The requirement to condition the power from RE sources and the type and mode of operation of the power electronic converters used to interface such generators to the grid The flow of power over networks supplied from conventional plus RE sources with particular reference to voltage control and protection The economics and trading of green electricity in national and international deregulated markets The expected developments in RE technology and the future shape of power systems where the penetration from RE sources is large and where substantial operational and control benefits will be derived from extensive use of power electronic interfaces and controllers The text is designed to be intelligible to readers who have little previous knowledge of electrical engineering The more analytical electrical aspects are relegated to an Appendix for readers who wish to gain a more in depth understanding The book s flexible structure makes its accessible to the general engineer or scientists but also caters for readers with a non scientific background Economists planners and environmental specialists will find parts of the book informative
