

E. How many electrons are in Mg^{2+} ?

10

Activity B:

Electron arrangements

Get the Gizmo ready:

- Create a neutral hydrogen atom (1 proton, 0 neutrons, 1 electron).

Question: How are electrons arranged around the nucleus of an atom?

1. Observe: Add electrons to the atom until you have used all the available electrons. How are the electrons arranged?

They are not overlapping and are moving in circular orbits around the nucleus.

2. Analyze: Electrons are arranged in orbits called **energy levels**. The Gizmo shows all of the first two energy levels but only part of the third energy level.

A. How many electrons can fit in the first energy level?

2

B. How many electrons can fit in the second energy level?

8

C. How many electrons fit in the part of the third energy level shown?

8

3. Observe: Click **Reset** (↺). The electrons in the outermost orbit, called **valence electrons**, help to create chemical bonds. Create a lithium atom (3 protons, 4 neutrons, 3 electrons).

How many valence electrons are in a neutral lithium atom?

1

4. Diagram: Turn on **Show electron dot diagram**. The valence electrons of an atom are shown in an **electron dot diagram**. Each dot represents a valence electron. 🖋️ Draw the electron dot diagram for neutral lithium: (Right Click on the element, click "edit", move the dots around Li)

5. Practice: Turn off **Show electron dot diagram**. Use the Gizmo to create a neutral atom of each of the following elements. 🖋️ Draw the electron dot diagram for each: (Right Click on the picture, click "edit", move the dots around the element symbols) When you are finished, turn on **Show electron dot diagram** and check your answers.

6. Extend your thinking: Many chemical properties are determined by the number of valence electrons. Elements with the same number of valence electrons will have similar properties.

Which element has similar properties to lithium?

Na

Beryllium?

Mg

Explain:

Their valence electron count is same.

technologies have the potential to expand and liberate education but their inconsistent history raises questions about their effectiveness in addressing these challenges Implementing Inclusive Educational Models and Technologies for Equity and Diversity offers a comprehensive and timely reference source that aims to provide an opportunity for reflection on the crucial issue of inclusion and equity in the context of educational improvements This research book provides relevant academic work empirical research findings and an overview of this relevant field of study It also covers recommended topics such as mobile and blended learning teaching and learning strategies technological concerns and ethical and sociological concerns such as accessibility for users with diverse disabilities and addressing individual differences By providing a platform for research opportunities and increasing understanding of inclusion and equity in education the book can contribute to the development of effective strategies and tactics to create inclusive educational environments that leverage digital technologies

The Present and Future of Immunology Education Andrea Bottaro, Deborah M. Brown, John Gregory Frelinger, 2022-01-24

The explosion of basic and applied immunology in the first decades of the 21st century has brought forth new opportunities and challenges for immunology education at all academic levels from professional to undergraduate medical graduate and post graduate instruction Moreover developing methods and techniques for educating general audiences on the importance and benefits of immunology will be critical for increasing public awareness and support One major immediate challenge consists in accommodating within the confines of traditional immunology curricula a body of knowledge that continues to grow exponentially in both size and complexity Furthermore the practical toolbox of immunological research has vastly expanded and even in the present environment of highly interdisciplinary and collaborative science future immunologists will likely need to be at least conversant in for instance computational structural and system biology nanotechnology and tissue engineering At the same time our perspective of the immune system has progressively developed from primarily a host defense mechanism to a fundamental homeostatic system with organism wide physiological and clinical significance and with potentially transformative biotechnological and therapeutic applications As a consequence in addition to stand alone courses immunology is increasingly integrated into other courses or distributed longitudinally throughout a multi year curriculum This necessitates inter disciplinary approaches to reach an expanding range of disciplines as diverse as neurobiology cancer biology oncology infectious diseases pharmacology orthopedics and bioengineering Creative approaches and pedagogical flexibility will be needed to avoid the pitfall of one size fits all instruction and to tailor level and discipline appropriate content to different types of students using multiple teaching formats Finally like most other disciplines immunology education is also under strong pressure to introduce new didactic strategies that are relevant and meaningful to a generation of students who are digital natives comfortable with and expect on demand and multi modal learning diversified sources and active engagement Thankfully the dynamic and interactive behavior of immune system cells now visualized with striking immediacy by in vivo imaging has the ability to capture and hold the interest of even the most jaded learner The need for an

increasingly immunology knowledgeable workforce not just academic and industry scientists but also clinical and research lab technicians biomedical engineers and physicians in a growing array of specialties will also expand job opportunities for immunologists as educators and for content creators dedicated to generating new didactic tools in this field

Conservativism: A Cultural-Psychological Exploration Enno Freiherr von Fircks,2024-02-23 The present work discusses the phenomenon of conservatism from a qualitative cultural psychological perspective As such the text breaks with current mainstream research about political ideologies wanting to assess a political culture within the simple administration of a questionnaire The SpringerBrief will oppose such a perspective trying to assess how the conservative minded person will structure space and time in peculiar ways In the first part of the study participants were invited to reflect about how they preserve or conserve meaning in various activities whereas the second part of the study tried to shed light onto how something preservable or conservable comes into being and what it actually makes it preservable Here an autoethnographic study revealed that something becomes meaningfully preservable when it satisfies multiple demands of the Self as well as of the environment Readers will realize the insufficiency of the positivistic attitude analyzing conservatism from a simple quantitative perspective and researchers are shown how political ideologies or cultures can be assessed ecologically something that has not yet been undertaken This leads to an appeal for scientists to study the phenomenon of conservatism more wholistically
