Chapman McGrew, Jr., Charles B. Monroe, 2009-04-22 Written for undergraduate geography majors and entry level graduate students with limited backgrounds in statistical analysis and methods McGrew and Monroe provide a comprehensive and understandable introduction to statistical methods in a problem solving framework Engaging examples and problems are drawn from a variety of topical areas in both human and physical geography and are fully integrated into the text Without compromising statistical rigor or oversimplifying the authors stress the importance of written narratives that explain each statistical technique After introducing basic statistical concepts and terminology the authors focus on nonspatial and spatial descriptive statistics They transition to inferential problem solving including probability sampling and estimation before delving deeper into inferential statistics for geographic problem solving The final chapters examine the related techniques of correlation and regression A list of major goals and objectives is included at the end of each chapter allowing students to monitor their own progress and mastery of geographic statistical materials An epilogue offering over 150 geographic situations gives students a chance to figure out which statistical technique should be used for a particular situation Elementary Statistics Ron Larson, Betsy Farber, Jay R. basic statistics and statistical methods of analysis But a casual acquaintance with a few simple statistics will not serve the social scientist who attempts to read competently the literature of the field And if one wishes to do quantitative social research and most research published today is quantitative a more thorough knowledge of statistics is imperative The aspiring sociologist need only examine the books and articles that are being published today for evidence of this claim A very large portion of the articles published in the major sociology journals use some form of statistical analysis Some of these articles and other works published sociologists are incomprehensible without a statistics background others will simply be read less intelligently or with a lessened sense of appreciation or criticism *Elementary Statistics* Ron Larson,Betsy Farber,2011-01-20 Books a la Carte are unbound three hole punch versions of the textbook This lower cost option is easy to transport and comes with same access code or media that would be packaged with the bound book *Elementary Statistics Picturing the World Fifth Edition* offers our most accessible approach to statistics with more than 750 graphical displays that illustrate data students are able to visualize key statistical concepts immediately Adhering to the philosophy that students learn best by doing this book relies heavily on examples 25% of the examples and exercises are new for this edition Larson and Farber continue to demonstrate that statistics is all around us and that it s easy to understand This Package Contains **ELEMENTARY STATISTICS PICTURING THE WORLD 5e** a la Carte edition with MyMathLab MyStatLab Student Access Kit
