*Eleven Stirling Engine Projects You Can Build* Jim B. Larsen, Jim R. Larsen, 2012 Presents eleven projects demonstrating how to build simple fun and educational Stirling engines from available kits *Quick and Easy Stirling Engine* Jim R. Larsen, 2011-09 Do you know how to make a working engine from soda cans You do now The Quick and Easy Stirling Engine book will show you every detail you need to know There are no difficult secrets and no expensive parts to buy With two soda cans and a few other materials you can build a running engine in just a few hours The engine featured in this book was designed for use in educational settings Consulting with several educators this engine was designed so that it could be assembled with simple hand tools by most builders in about three hours The parts list is simple and affordable Simple hand tools are all that is required for assembling this engine Once assembled the engine will spin a flywheel when the bottom is heated and ice is placed on top This is a hot air engine design sometimes referred to as a Stirling Engine The engine makes motion by exercising a temperature differential The bottom half of the engine must be warmed to about 250 degrees F and the top of the engine must be cooled with cold water or ice When these conditions are present the engine will spin between 100 and 200 rpm The primary components of this engine are soda cans copper wire and an old CD The adhesive that is used for construction is readily available at hardware stores This engine is a fun project for students home builders hobbyists and anyone who wants to learn how to make their own hot air engine from soda cans [Energy Research and Development Projects in the Nordic Countries](#) ,1988 NEK rapport 1988 3 [Energy Research and Development Projects in the Nordic Countries. Directory 1988](#) , This is the seventh directory of research development and demonstration projects carried out within the field of energy and of energy related subjects in the Nordic countries The directory incorporates projects in progress during 1989 2209 projects most of which are financed by special public funds are described In addition to projects concerning energy sources energy utilization and energy conservation the directory also includes descriptions of research on environmental ecological and socioeconomic issues etc where these are related to the main subject The directory thus provides direct access to topical information relevant to a very comprehensive field of research In the appendices the organization of the Nordic Energy Research Programme and of energy research in each Nordic country is explained and the content and uses of the Nordic data base Nordic Energy Index are described Names of people to contact addresses telephone numbers and other useful information can also be found in addition to details about newsletters providing information on current research in some of the Nordic countries *Automotive Stirling Engine Development Project* William D. Ernst, Richard K. Shaltens, 1997 The objectives of the Automotive Stirling Engine ASE Development project were to transfer European Stirling engine technology to the United States and develop an ASE that would demonstrate a 30% improvement in combined metro highway fuel economy over a comparable spark ignition SI engine in the same production vehicle In addition the ASE should demonstrate the potential for reduced emissions levels while maintaining the performance characteristics of

SI engines Mechanical Technology Incorporated MTI developed the ASE in an evolutionary manner starting with the test and evaluation of an existing stationary Stirling engine and proceeding through two experimental engine designs the Mod I and the Mod II Engine technology development resulted in elimination of strategic materials increased power density higher temperature and efficiency operation reduced system complexity long life seals and low cost manufacturing designs Mod II engine dynamometer tests demonstrated that the engine system configuration had accomplished its performance goals for power 60 kW and efficiency 38.5% to within a few percent Tests with the Mod II installed in a delivery van demonstrated a combined fuel economy improvement consistent with engine performance goals and the potential for low emissions levels A modified version of the Mod II was identified as a manufacturable ASE design for commercial production In conjunction with engine technology development technology transfer proceeded through two ancillary efforts the Industry Test and Evaluation Program ITEP and the NASA Technology Utilization TU project The ITEP served to introduce Stirling technology to industry and the TU project provided vehicle field demonstrations for thirdparty evaluation in everyday use and accomplished more than 3100 hr and 8 000 miles of field operation To extend technology transfer beyond the ASE project a Space Act Agreement between MTI and NASA Lewis Research Center allowed utilization of project resources for additional development work and emissions testing as part of an industry funded Stirling Natural Gas Engine program Monthly Catalog of United States Government Publications United States. Hendershot,Marjorie C. Horn,William D. Mosher,1988 The 1982 statistics on the use of family planning and infertility services presented in this report are preliminary results from Cycle III of the National Survey of Family Growth NSFG conducted by the National Center for Health Statistics Data were collected through personal interviews with a multistage area probability sample of 7969 women aged 15-44 A detailed series of questions was asked to obtain relatively complete estimates of the extent and type of family planning services received

Statistics on family planning services are limited to women who were able to conceive 3 years before the interview date Overall 79% of currently married nonsterile women reported using some type of family planning service during the previous 3 years There were no statistically significant differences between white 79% black 75% or Hispanic 77% wives or between the 2 income groups The 1982 survey questions were more comprehensive than those of earlier cycles of the survey The annual rate of visits for family planning services in 1982 was 1077 visits 1000 women Teenagers had the highest annual visit rate 1581 1000 of any age group for all sources of family planning services combined Visit rates declined sharply with age from 1447 at ages 15 24 to 479 at ages 35 44 Similar declines with age also were found in the visit rates for white and black women separately Nevertheless the annual visit rate for black women 1334 1000 was significantly higher than that for white women 1033 The highest overall visit rate was for black women 15 19 years of age 1867 1000 Nearly 2 3 of all family planning visits were to private medical sources Teenagers of all races had higher family planning service visit rates to clinics than to private medical sources as did black women age 15 24 White women age 20 and older had higher visit rates to private medical services than to clinics Never married women had higher visit rates to clinics than currently or formerly married women Data were also collected in 1982 on use of medical services for infertility by women who had difficulty in conceiving or carrying a pregnancy to term About 1 million ever married women had 1 or more infertility visits in the 12 months before the interview During the 3 years before interview about 1 9 million women had infertility visits For all ever married women as well as for white and black women separately infertility services were more likely to be secured from private medical sources than from clinics The survey design reliability of the estimates and the terms used are explained in the technical notes **Secretary's Annual Report to Congress** United States.
