Dobrowolski,1993 The third edition of this classic brings the most up to date information on all aspects of concrete technology and construction Table of Contents Section 1 Materials for Concrete Section 2 Properties of Concrete Section 3 Proportioning Mixtures and Testing Section 4 Framework and Shoring Section 5 Batching Mixing and Transporting Section 6 Placing Concrete Section 7 Finishing and Curing Section 8 Special Concrete and Techniques Section 9 Advanced Building Construction Systems Section 10 Specialized Practices Section 11 Precast and Prestressed Concrete Section 12 Architectural Concrete Section 13 Repair of Concrete Index      **Use of Permeable Formwork in Placing and Curing Concrete** P. G. Malone,1999 Permeable framework is a special class of lined formwork used to produce improvements in the strength and durability of concrete The bracing and the liner in the formwork are engineered to resist the pressure of plastic or fresh concrete but to allow trapped air and excess water to pass through and be removed during concrete placement and consolidation The objective in using permeable formwork is to eliminate voids on the surface of the concrete bug holes and to increase the strength and durability of the concrete surface immediately behind the formwork A review of permeable formwork and its use in placing concrete was conducted Methods techniques and materials are discussed and example applications are described Benefits of using permeable formwork include a reduction in bug holes and surface defects

improved resistance to freezing and thawing reduced rates of surface carbonation and chloride ion infiltration increased surface strength reduced form coating requirements reduced efforts in curing and reduced surface preparation for coating The cost of using permeable formwork varies greatly among job sites However the cost of using permeable formwork will generally be double that for conventional impermeable formwork Cost savings can be realized in the extended life of any wooden formwork used behind the filter fabric the ability to proceed without applying form release compounds the decreased cost of final surface preparation if coatings are to be applied to the finished concrete and the increased service life of the finished concrete Information Management ,1993 Modern Mechanics and Applications Nguyen Tien Khiem,Tran Van Lien,Nguyen Xuan Hung,2021-09-06 This proceedings book includes a selection of refereed papers presented at the International Conference on Modern Mechanics and Applications ICOMMA 2020 which took place in Ho Chi Minh City Vietnam on December 2 4 2020 The contributions highlight recent trends and applications in modern mechanics Subjects covered include biological systems damage fracture and failure flow problems multiscale multi physics problems composites and hybrid structures optimization and inverse problems lightweight structures mechatronics dynamics numerical methods and intelligent computing additive manufacturing natural hazards modeling The book is intended for academics including graduate students and experienced researchers interested in recent trends in modern mechanics and application
