Wording the World Roma Chatterji, 2014-12-01 The essays in this book explore the critical possibilities that have been opened by Veena Das s work Taking off from her writing on pain as a call for acknowledgment several essays explore how social sciences render pain suffering and the claims of the other as part of an ethics of responsibility They search for disciplinary resources to contest the implicit division between those whose pain receives attention and those whose pain is seen as out of sync with the times and hence written out of the historical record Another theme is the co constitution of the event and the everyday especially in the context of violence Das s groundbreaking formulation of the everyday provides a frame for understanding how both violence and healing might grow out of it Drawing on notions of life and voice and the struggle to write one s own narrative the contributors provide rich ethnographies of what it is to inhabit a devastated world Ethics as a form of attentiveness to the other especially in the context of poverty deprivation and the corrosion of everyday life appears in several of the essays They take up the classic themes of kinship and obligation but give them entirely new meaning Finally anthropology s affinities with the literary are reflected in a final set of essays that show how forms of knowing in art and in anthropology are related through work with painters performance artists and writers

Fraught with Pain Pereira, Isabel, Ramírez, Lucía, 2019-09-04 This book seeks to facilitate linkages between discussions on the right to health and discussions on drug policy reform The populations we talk about here are the ones most in need of a change whereby drug culture measures cease to stand in the way of a life free from pain The suffering and pain experienced by people with terminal illnesses and people with heroin use disorder can be alleviated through opioids At the same time the enforcement of international drug control treaties means that these medicines are subjected to strict controls that create excessive red tape and contribute to generalized fear among patients and health professionals concerning these medicines use Although many opioids are included in the World Health Organization's list of essential medicines the fact that they are controlled substances means that in practice the right to health of these two populations often is violated *Fraught with Pain* offers a diagnosis of five Colombian cities with regard to the barriers that both populations patients at the end of life and individuals with heroin use disorder face when trying to access opioids The hurdles

they encounter can be grouped into four categories 1 Structural failings of the Colombian health system 2 A lack of institutional capacity to maintain sufficient opioid stocks in small and medium cities 3 A lack of specialized training among health professionals in small and medium cities on the issues of palliative care and psychoactive substance use disorders 4 Stigma surrounding opioids and the people who use them Analyzing the enjoyment of the right to health among these two groups of people would seem ill advised for what could they and the health care they receive possibly have in common However this book argues that someone facing the end of life and someone with a heroin use disorder actually face similar challenges they are both in need of the same controlled substances they both require interdisciplinary treatment that extends beyond opioids they both seek health services during moments of extreme vulnerability and they are both often treated negligently by health systems that are ill equipped to handle death and drug dependence Fraught with Pain seeks to facilitate linkages between discussions on the right to health and discussions on drug policy reform The populations we talk about here are the ones most in need of a change whereby drug culture measures cease to stand in the way of a life free from pain Description tomada de <https://www.dejusticia.org/en/publication-fraught-with-pain-access-to-palliative-care-and-treatment-for-heroin-use-disorder-in-colombia> Fundamental Skills for Patient Care in Pharmacy Practice Colleen Doherty Lauster, Sneha Baxi Srivastava, 2013-03-25 Fundamental Skills for Patient Care in Pharmacy Practice enables students and new pharmacists to master the skills associated with clinical care in either the inpatient or outpatient setting In accessible steps this valuable resource provides the tools for gaining medication histories from patients and counseling them on the most effective and safe manner to take medications Each chapter explores the background and practice of a critical skill tools that aid in its development and mastery and tips for success Students and pharmacists will come away with the knowledge to identify drug related problems and formulate plans for solutions to these problems Fundamental Skills for Patient Care in Pharmacy Practice prepares future pharmacists to communicate effectively in verbal and written formats with health professionals and special patient populations as they prepare and present SOAP notes patient cases and discharge counseling
