Envisioning the National Health Care Quality Report Institute of Medicine,Board on Health Care Services,Committee on the National Quality Report on Health Care Delivery,2001-04-22 How good is the quality of health

care in the United States Is quality improving Or is it suffering While the average person on the street can follow the state of the economy with economic indicators we do not have a tool that allows us to track trends in health care quality Beginning in 2003 the Agency for Healthcare Research and Quality AHRQ will produce an annual report on the national trends in the quality of health care delivery in the United States AHRQ commissioned the Institute of Medicine IOM to help develop a vision for this report that will allow national and state policy makers providers consumers and the public at large to track trends in health care quality Envisioning the National Health Care Quality Report offers a framework for health care quality specific examples of the types of measures that should be included in the report suggestions on the criteria for selecting measures as well as advice on reaching the intended audiences Its recommendations could help the national health care quality report to become a mainstay of our nation s effort to improve health care *The Writing Report Card, 1984-88*

Arthur N. Applebee, 1990 Based on two national assessments of the writing proficiency of representative samples of students in grades 4 8 and 11 conducted during the school years ending in 1984 and 1988 this report assesses the informative persuasive and imaginative writing performance of the nation s students and tracks changes in performance over time The first three chapters of the report describe student performance on the informative persuasive and imaginative writing tasks included in the writing trend assessments based on the results of the primary trait and holistic analyses The fourth chapter summarizes trends in average task accomplishment for the nation and various demographic subpopulations In the fifth chapter trends in students grammar punctuation and spelling are discussed The sixth chapter discusses factors that appear to be related to writing performance such as students instructional experiences and home environment The report concludes that despite some progress on some tasks students writing performance across tasks remains low and has changed little across time The report also finds that the extent to which students at all grade levels value writing use it in their own lives and engage in writing process activities remains quite limited A procedural appendix and an appendix of data are attached RS Emerson's Place C.C.
