

INTRODUCTION

Inkjet printing is a mature technique for ~~colourful~~ colorful graphic arts. It ~~exels-~~ excels at customized, large-area, high-resolution, and small-volume production. With the developments in conductive, dielectric, and even semi-conducting inks, there ~~is~~ is potential for large area ~~ink jet-inkjet~~ electronics fabrication. Passive radio frequency devices can benefit greatly from a printing process, seeing as the size of ~~those~~ these devices is defined by the frequency of operation. The large size of radio frequency passives means that they either take up expensive space "on chip", or ~~they~~ are fabricated on a ~~seperate-separate~~ lower cost ~~substrate-substrate~~ and ~~some-how-somehow~~ bonded to the chips. This has hindered cost-sensitive high volume ~~A~~ applications such as radio frequency identification tags. While ~~many-much~~ work has been undertaken on inkjet-printed ~~conductors-conductors~~ for passive ~~antennaes-antennas~~ on microwave substrates and even paper, little work has been done on the printing of the dielectric materials aimed at radio frequency passives.

Both the conductor and dielectric ~~needs~~ to be integrated to create a multilayer inkjet printing process that is capable of making quality passives ~~like-such as~~ capacitors and inductors. Three inkjet-printed dielectrics are investigate in this thesis: a ceramic (alumina), a thermal-cured polymer (-poly 4 vinyl phenol), and a UV-cured polymer (acrylic based). Both a silver nanoparticle ink ~~as-well-as-and~~ a custom in-house formulated particle-free silver ink ~~are-was~~ explored for the conductor. The focus is ~~in-on~~ passives, mainly capacitors and inductors. Comparing to low frequency electronics, radio frequency components have additionally sensitivity with regarding to skin depth of the conductor and surface roughness, as well as dielectric constant and loss tangent ~~from-of~~ the dielectric. ~~Those-These~~ concerns are investigated with the aim ~~at-of~~ making the highest quality components possible and ~~to~~ understanding the current limitations of inkjet-fabricated radio frequency devices.

Best Practices for Flipping the College Classroom Julie B. Waldrop, Melody A. Bowdon, 2015-06-26 Best Practices for Flipping the College Classroom provides a comprehensive overview and systematic assessment of the flipped classroom methodology in higher education The book Reviews various pedagogical theories that inform flipped classroom practice and provides a brief history from its inception in K 12 to its implementation in higher education Offers well developed and instructive case studies chronicling the implementation of flipped strategies across a broad spectrum of academic disciplines physical environments and student populations Provides insights and suggestions to instructors in

higher education for the implementation of flipped strategies in their own courses by offering reflections on learning outcomes and student success in flipped classrooms compared with those employing more traditional models and by describing relevant technologies Discusses observations and analyses of student perceptions of flipping the classroom as well as student practices and behaviors particular to flipped classroom models Illuminates several research models and approaches for use and modification by teacher scholars interested in building on this research on their own campuses The evidence presented on the flipped classroom methodology by its supporters and detractors at all levels has thus far been almost entirely anecdotal or otherwise unreliable Best Practices for Flipping the College Classroom is the first book to provide faculty members nuanced qualitative and quantitative evidence that both supports and challenges the value of flipping the college classroom

Academic and Research Literacy Practices of Final Year Teacher Trainees in Luanda, Angola Celeste Sambeny,2016-06-22 Academic and Research Literacy Practices of Final Year Teacher Trainees in Luanda Angola presents a detailed study of students and lecturers at higher teacher training institutions where English is taught as a medium of instruction and specialisation As such the book will help raise the awareness of educators teachers and supervisors of the need to be more supportive to students and will highlight the importance of increased responsibility on the part of the students regarding their studies especially during the process of writing their research reports Practical experience has shown that in most classrooms students are typically asked to produce texts for one single audience namely the teacher or the lecturer who already knows what constitutes an acceptable response However in many classrooms teachers and lecturers tend to believe that literacy can be defined as the ability to encode and decode texts the ability to decipher the main idea of a reading passage or to write a text that obeys the general conventions of language usage such as syntax organisation and idea development The central argument of this book however is that at higher levels of the educational system in Angola academic and research literacy practices are at best questionable and at worst harmful An extensive re evaluation of assumptions regarding student capability and what it means to be a literate in the twenty first century information society is of critical importance Such a re examination allows for extensive reflection on current practices and a powerful critique of traditional academic and research literacy methods and suggests ways in which practices of quality teaching and learning may be implemented
