Rundle, Alireza Bahadori, Ken Doust, 2019-05-30 This volume outlines a progressively staged process focused on fostering a more effective more efficient and greener global construction industry. The research based book commences with an evaluation of eight methodologies identified after a worldwide literature and compliance review It is followed by a more detailed report on four of these options with the ultimate objective of independent selection within the construction engineering community of a single most appropriate methodology as the approach for further more detailed investigation The eight methodologies were selected against six key performance indicators developed as assessment criteria and include

knowledge management lean construction construction contract procurement practices optimal work duration on site construction site waste rationalization of construction safety regulations sustainable construction labor force and portfolio project development A primary outcome of the selected methodology being atriple bottom line benefit to key stakeholders commercially and also to the ecology along with the community at large Front end construction waste strategies to serve as best practices to minimize waste generated by construction projects was the methodology selected for detailed research The text also covers the primary sources of construction waste The book is ideal for civil and construction engineers as well as Applications of Wet-End Paper Chemistry project developers managers and public sector waste management specialists Che On Au, I.
