

CHAPTER
16

Endocrine and Reproductive Health

LESSON 1

The Endocrine System

BIG Idea

Your body's endocrine system sends and receives chemical messages that control many body functions.

Study Coach

Flashcards Write the name of each endocrine gland on the front side of a blank index card. Write the function of each on the reverse side. When you have completed the lesson, partner with a friend and use the cards to check your knowledge.

Endocrine Gland
Function of Endocrine Gland

READING CHECK

- Define** What are hormones?

● **Before You Read**

When you are startled or frightened, your endocrine system causes your body to react. On the lines below, describe how your body reacts in these situations. As you read, add additional details explaining why this reaction takes place.

● **Read to Learn**

How the Endocrine System Works

Endocrine glands are groups of cells that secrete hormones into the bloodstream. **Hormones** are chemicals that help regulate many of your body's functions. During puberty, hormones trigger physical and emotional changes in the body. Some hormones also control growth. Abnormally high or low amounts of these hormones may be a factor in growth disorders. Factors such as stress, infection, and changes in fluid balance may also affect hormone levels. Hormones work to maintain balances in the body so that important functions can take place. The figure on page 227 describes the major glands of the endocrine system and the body functions they control. 

What is the function of the pituitary gland?

The pituitary gland is also known as the master gland. It controls the activities of all other glands. The pituitary gland has three sections, or lobes.

Endocrine And Reproductive Health Packet Answers
