

5. Why is radiant energy so important to the survival of our planet?

Radiant energy is so important to the survival of our planet because without heat and light from the Sun, there would be no life on Earth. In addition, plants use radiant energy from the sun to create their own food through photosynthesis. Animals eat these plants, and we, in turn, eat these animals.

6. What are the three components of atoms?

nucleus

proton

electron

7. What causes static electricity?

Static electricity occurs when objects rub together and electrons from one are transferred to the other, causing an imbalance in the number of protons and electrons.

8. Classify each of the following forms of energy :

a) a battery chemical energy

b) an archer drawing back his bow potential energy
