International on Combustion covers the proceedings of the Ninth Symposium International on Combustion held at Cornell
University in Ithaca New York on August 27 to September 1 1962 under the auspices of the Combustion Institute The book
focuses on the processes and reactions involved in combustion The selection first offers information on flame strength of
propane oxygen flames at low pressures in turbulent flow and mixing and flow in ducted turbulent jets Topics include radial
profile of the jetting velocity radial growth of the jet and mixing zones of a ducted jet The text then elaborates on turbulent
flame studies in two dimensional open burners turbulent mass transfer and rates of combustion in confined turbulent flames
and flame stabilization in a boundary layer The publication examines the theoretical study of properties of laminar steady
state flames as a function of properties of their chemical components and spectra of alkali metal organic halide flames The
text then takes a look at the thermal radiation theory for plane flame propagation in coal dust clouds flame characteristics of
the diborane hydrazine system and studies of the combustion of dimethyl hydrazine and related compounds The selection is a
