**Finding Communities in Social Networks Using Graph Embeddings** Mosab Alfaqeeh,David B. Skillicorn,2024-06-29 Community detection in social networks is an important but challenging problem This book develops a new technique for finding communities that uses both structural similarity and attribute similarity simultaneously weighting them in a principled way The results outperform existing techniques across a wide range of measures and so advance the state of the art in community detection Many existing community detection techniques base similarity on either the structural connections among social network users or on the overlap among the attributes of each user Either way loses useful information There have been some attempts to use both structure and attribute similarity but success has been limited We first build a large real world dataset by crawling Instagram producing a large set of user profiles We then compute the similarity between pairs of users based on four qualitatively different profile properties similarity of language used in posts similarity of hashtags used which requires extraction of content from them similarity of images displayed which requires extraction of what each image is about and the explicit connections when one user follows another These single modality similarities are converted into graphs These graphs have a common node set the users but different sets a weighted edges These graphs are then connected into a single larger graph by connecting the multiple nodes representing the same user by a clique with edge weights derived from a lazy random walk view of the single graphs This larger graph can then be embedded in a geometry using spectral techniques In the embedding distance corresponds to dissimilarity so geometric clustering techniques can be used to find communities The resulting communities are evaluated using the entire range of current techniques outperforming all of them Topic modelling is also applied to clusters to show that they genuinely represent users with similar interests This can form the basis for applications such as online marketing or key influence selection **Pragmatics of Social Media** Christian Hoffmann,Wolfram Bublitz,2017-09-11 This handbook provides a comprehensive overview of the pragmatics of social media i e of digitally mediated and Internet based platforms which are interactively used to share and edit self and other generated textual and audio visual messages Its five parts offer state of the

art reviews and critical evaluations in the light of on going developments Part I The Nature of Social Media sets up the conceptual groundwork as it explores key concept such as social media participation privacy publicness Part II Social Media Platforms focuses on the pragmatics of single platforms such as YouTube Facebook Part III Social Media and Discourse covers the micro and macro level organization of social media discourse while Part IV Social Media and Identity reveals the multifarious ways in which users collectively re construct aspects of their identities Part V Social Media and Functions Speech Acts surveys pragmatic studies on speech act functions such as disagreeing complimenting requesting Each contribution provides a state of the art review together with a critical evaluation of the existing research      **Contemporary Rhetorical Theory** John Louis Lucaites,Celeste Michelle Condit,Sally Caudill,1999-01-01 This indispensable text brings together important essays on the themes issues and controversies that have shaped the development of rhetorical theory since the late 1960s An extensive introduction and epilogue by the editors thoughtfully examine the current state of the field and its future directions focusing in particular on how theorists are negotiating the tensions between modernist and postmodernist considerations Each of the volume s eight main sections comprises a brief explanatory introduction four to six essays selected for their enduring significance and suggestions for further reading Topics addressed include problems of defining rhetoric the relationship between rhetoric and epistemology the rhetorical situation reason and public morality the nature of the audience the role of discourse in social change rhetoric in the mass media and challenges to rhetorical theory from the margins An extensive subject index facilitates comparison of key concepts and principles across all of the essays featured      **Advances in Motivation Science** Andrew J.
