The Age of Ecology Joachim Radkau, 2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroots movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time

How Everything Can Collapse Pablo Servigne, Raphaël Stevens, 2020-03-27 What if our civilization were to collapse? Not many centuries into the future, but in our own lifetimes. Most people recognize that we face huge challenges today from climate change and its potentially catastrophic consequences to a plethora of socio-political problems, but we find it hard to face up to the very real possibility that these crises could produce a collapse of our entire civilization. Yet we now have a great deal of evidence to suggest that we are up against growing systemic instabilities that pose a serious threat to the capacity of human populations to maintain themselves in a sustainable environment. In this

important book Pablo Servigne and Raphaël Stevens confront these issues head on They examine the scientific evidence and show how its findings often presented in a detached and abstract way are connected to people's ordinary experiences joining the dots as it were between the Anthropocene and our everyday lives In so doing they provide a valuable guide that will help everyone make sense of the new and potentially catastrophic situation in which we now find ourselves Today utopia has changed sides it is the utopians who believe that everything can continue as before while realists put their energy into making a transition and building local resilience Collapse is the horizon of our generation But collapse is not the end it's the beginning of our future We will reinvent new ways of living in the world and being attentive to ourselves to other human beings and to all our fellow creatures *I Parry Everything: What Do You Mean I'm the Strongest?
