

# Foreign Policy White Paper 2017

Submission by Ian Dudgeon

## Introduction

This submission addresses the issues of the primary importance to us of the Asia-Pacific region, our interests and values, who we are and our image, the need for an independent foreign policy, the US alliance, regional engagement, our multilateral and international legal commitments, and aid and development assistance. It puts the views of the author, an active practitioner in international affairs.

## The role of foreign policy

The fundamental role of Australia's foreign policy is to protect and promote Australia's national interests within the global community of which we are part.

## Our region

While recognising we are part of a global community, the Asia-Pacific region is the area of primary importance to us for political, economic and national security reasons.

Geographically, this region reaches from South Asia through to North America. It includes India, China, Japan, South Korea, Russia, the US and Canada. It also includes Indonesia and the other ASEANs, as well as New Zealand and those Pacific Island states in the South West Pacific. Also included are critical sea lanes for international trade, especially the Malacca Strait and South China Sea.

This region is home to more than half the world's population, it is the new engine room of the global economy, and the region encompassing most of our two-way trade and investment. Also, more than anywhere else, any major event and most other events that occur in this region, inevitably, will affect at least some, potentially all, of Australia's national interests, directly or indirectly.

The Indo-Pacific region is also important to Australia, but in relative terms, less so than the Asia-Pacific. This region overlaps with South, East and S.E. Asia and extends vital two-way sea lanes westward to include oil supply routes from the Middle East and sea trade access to and from Europe. These western reaches are also where most ADF overseas operational deployments have occurred during the past decade and a half (e.g. Afghanistan, Iraq) in support of UN-mandated or other alliance commitments. But the region's eastern boundary stops mid-Pacific, and most significantly, excludes North America.

**Handbook of Foreign Policy Analysis Methods** Patrick A Mello, Falk Ostermann, 2022-12-26 The disintegration and questioning of global governance structures and a re orientation toward national politics combined with the spread of technological innovations such as big data social media and phenomena like fake news populism or questions of global health policies make it necessary for the introduction of new methods of inquiry and the adaptation of established methods in Foreign Policy Analysis FPA This accessible handbook offers concise chapters from expert international contributors covering a diverse range of new and established FPA methods Embracing methodological pluralism and a belief in the value of an open discussion about methods assumptions and diverging positions it provides new state of the art research approaches as well as introductions to a range of established methods Each chapter follows the same approach introducing the method and its development discussing strengths requirements limitations and potential pitfalls while illustrating the method's application using examples from empirical research Embracing methodological pluralism and problem oriented research that engages with real world questions the authors examine quantitative and qualitative traditions rationalist and interpretivist perspectives as well as different substantive backgrounds The book will be of interest to a wide range of scholars and students in global politics foreign policy and methods related classes across the social sciences Chapters 4 25 and 32 of this book are available for free in PDF format as Open Access from the individual product page at [www.routledge.com](http://www.routledge.com) It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *Rising Powers and Foreign Policy Revisionism* Cameron G Thies, Mark David Nieman, 2017-11-29 Addresses concerns that rising powers may

generate international conflict focusing on Brazil Russia India China and South Africa BRICS      **Foreign Policy Responses to the Rise of Brazil** G. Gardini, M. Tavares de Almeida, 2017-03-22 Brazil has risen Its economic might and international activism are remarkable but the limitations to its capacity and will to turn potential power into concrete international influence are equally significant This book assesses the real impact of the rise of Brazil on other Latin American countries and how these countries have responded      A Transnational Account of Turkish Foreign Policy Hazal Papuççular, Deniz Kuru, 2020-05-25 This book offers an analysis of Turkish foreign policy based on transnationalist perspectives In order to counterbalance the state centric accounts that dominate this area of study the authors provide theoretical frameworks as well as historical and contemporary case studies that emphasize transnational dynamics The content is divided into four complementary sections that explain and exemplify transnational factors in the context of Turkish foreign policy The first addresses theoretical and ideational frameworks that illustrate the relevance of a transnational account while the second demonstrates the possibility of developing transnationally oriented approaches even in historical cases going beyond a presentist focus In the third and fourth sections the book focuses on two prominent non state actors namely diaspora communities and non governmental organizations which operate at the interstices of the domestic and the international This allows the authors to highlight the significance of transnational dynamics in Turkey's foreign policy      **Race and U.S. Foreign Policy from Colonial Times Through the Age of Jackson** E. Nathaniel Gates, 2021-12-24 First published in 1998 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source      **Nigerian Foreign Policy 60 Years After Independence** Usman A. Tar, Sharkdam Wapmuk, 2023-01-30 This book covers critical

issues in Nigeria's external relations since 1960. As an independent nation, Nigeria has stood out as the most populous black country in the world and contributed immensely to the search for solutions to pressing international issues, notably in Africa. Nigeria has also participated actively in global affairs and used the platform of international organisation to advance her national interests, cognisant also of its regional and global obligations and responsibilities. Contributors to this thought-provoking book make a strong case for Nigeria to press for a foreign policy that puts Nigerian people at the centre. One of the strong points also emanating from the contributors of this book is the imperative for Nigeria to address domestic challenges that continue to impinge on the country's external image.

*Handbook of Regional Conflict Resolution Initiatives in the Global South* Jeronimo Delgado-Caicedo, 2022-07-28

During the first half of the twentieth century, the international system was largely dominated by the USA and the colonial powers of western Europe. After the two world wars, the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics. However, as it is the norm in the international system, power structures are not immutable. After the end of the Cold War, rapid changes to the existing international hierarchies took place as new countries from the so-called developing world began to emerge as crucial actors capable of questioning and altering the power dynamics of the world. It is therefore unthinkable to ignore emerging countries such as Russia, the People's Republic of China, India, Brazil, or South Africa in the decision-making process in today's world order. In addition, there is a group of smaller yet increasingly important countries that, while acknowledging their inability radically to change the rules of the international system, are still eager to shift power relations and enhance their influence in the world. Argentina, Colombia, Egypt, Indonesia, Iran, South Korea, Mexico, Nigeria, Pakistan, Saudi Arabia, Turkey, and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South. While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions, previous analyses have focused primarily on the impact that emerging powers have had in their own regions. This volume, instead, aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers. In other words, this book explores the relation between a country's involvement in conflict resolution initiatives and its positioning in the international system. The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global South, particularly from states that have strengthened or sometimes weakened their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives.
