**Select Notes** Francis Nathan Peloubet, Mary Abby Thaxter Peloubet, 1900      **Reclaiming Control as a Semantic and Pragmatic Phenomenon** Patrick Duffley, 2014-10-15 This monograph is part of a growing research agenda in which semantics and pragmatics not only complement the grammar but replace it The analysis is based on the assumption that human language is not primarily about form but about form meaning pairings This runs counter to the autonomous syntax postulate underlying Landau 2013 s Control in Generative Grammar that form must be hived off from meaning and studied separately Duffley shows control to depend on meaning in combination with inferences based on the nature of the events expressed by the matrix and complement the matrix subject the semantic relation between matrix and complement and a number of other factors The conclusions call for a reconsideration of Ariel 2010 s distinction in Defining Pragmatics between semantics and pragmatics on the basis of cancelability many control readings are not cancelable although they are pragmatically inferred It is proposed that the line be drawn rather between what is linguistically expressed and what is not linguistically expressed but still communicated ... *Select Notes on the International Sunday School Lessons* ... Wilbur Moorehead Smith, 1918      **Politics and the Theory of Language in the USSR 1917-1938** Craig Brandist, Katya Chown, 2011-10-01 Politics and the Theory of Language in the USSR 1917 1938 provides ground breaking research into the relationship between linguistic theory and politics during the first two decades of the USSR This work introduces some of the era s most notable figures whose achievements have been largely overlooked in the West and provides a thought provoking discussion of the innovative approaches they developed Some of these insights still have a progressive role to play in scholarship today      **For Blood and Money: Billionaires, Biotech, and the Quest for a Blockbuster Drug** Nathan Vardi, 2023-01-10 A master class in the machinations of modern drug development Adrian Woolfson Science A gripping business narrative and scientific thriller about what it takes to bring a wonder drug to market and save countless lives For Blood and Money tells the little known story of how an upstart biotechnology company created a one in a million cancer drug and how the core team denied their share of the profits went and did it again In this epic saga of money and science veteran financial journalist Nathan Vardi explains how the invention of two of the biggest cancer drugs in history became for their backers two of the greatest Wall Street bets of all time In the multibillion dollar business of biotech where pharmaceutical companies the government hedge funds and venture capitalists have spent billions on funding experimentation and treatments a single molecule can stop cancer in its tracks and make the people who find that rare molecule astonishingly rich For Blood and Money follows a small team at a biotech start up in California who have found one of these rare molecules Their compound known as a BTK inhibitor seems to work on a vicious type of leukemia When patients start rising from their

hospice beds the team knows they're onto something big What follows is a story of genius pathos and drama in which vivid characters navigate a world of corporate intrigue and ambiguous morality Vardi's narrative immerses readers in the recent explosion of biotech start-ups He describes the scientists doctors and investors who are risking everything to develop new life-saving treatments and introduces suffering patients for whom the stakes are life or death A gripping nonfiction read For Blood and Money illustrates why it's so hard to bring new drugs to market explains why they are so expensive and examines how profit-driven venture capitalists are shaping the future of medicine

**Data Rules** Cristina Alaimo, Jannis Kallinikos, 2024-06-04 A new social science framework for studying the unprecedented social and economic restructuring driven by digital data Digital data have become the critical frontier where emerging economic practices and organizational forms confront the traditional economic order and its institutions In Data Rules Cristina Alaimo and Jannis Kallinikos establish a social science framework for analyzing the unprecedented social and economic restructuring brought about by data Working at the intersection of information systems and organizational studies they draw extensively on intellectual currents in sociology semiotics cognitive science and technology and social theory Making the case for turning data making into an area of inquiry of its own the authors uncover how data are deeply implicated in rewiring the institutions of the market economy The authors associate digital data with the decentering of organizations As they point out centered systems make sense only when firms and formal organizations more broadly can keep the external world at arm's length and maintain a relative operational independence from it These patterns no longer hold Data transform the production of goods and services to an endless series of exchanges and interactions that defeat the functional logics of markets and organizations The diffusion of platforms and ecosystems is indicative of these broader transformations Rather than viewing data as simply a force of surveillance and control the authors place the transformative potential of data at the center of an emerging socioeconomic order that restructures society and its institutions

**English Linguistic Imperialism from Below** Leya Mathew, 2022-07-11 Imperialism may be over but the political economic and cultural subjugation of social life through English has only intensified This book demonstrates how English has been newly constituted as a dominant language in post-market reform India through the fervent aspirations of non-elites and the zealous reforms of English Language Teaching experts The most recent spread of English in India has been through low-fee private schools which are perceived as dubious yet efficient The book is an ethnography of mothering at one such low-fee private school and its neighboring state-funded school It demonstrates that political economic transitions experienced as radical social mobility fuelled intense desire for English schooling Rather than English schooling leading to social mobility new experiences of mobility necessitated English schooling At the same time experts have responded to the unanticipated spread of English by transforming it from a second language to a first language and earlier hierarchies have been produced

anew as access to English democratized      **The Language of Battered Women** Carol L. Winkelmann, 2012-02-01 Winner of the 2005 Outstanding Book Award presented by the Organization for the Study of Communication Language and Gender OSCLG This study of battered women living in a shelter offers a rhetorical analysis of survivors personal theologies Author Carol L Winkelmann holds that while it is virtually ignored in the domestic violence literature the Christian heritage of many battered women plays a significant if complicated role in their language thoughts and lives The women s religious faith serves not only to sustain them through periods of profound suffering but also to develop solidarity with other culturally different women in the shelter Designed to assist women to greater independence the shelter actually functions as a culture of surveillance where women turn to one another and to their faith to cope with the trauma of violence To heal the women engage in dialogue that is dense in religious imagery talking about the relationship of God and the church to suffering and evil At the same time these women also acknowledge that organized religion is very much involved in the maintenance of patriarchal marriage and its attendant abuses in their own lives Together battered women are sometimes able to construct creative theological responses to the problem of suffering and evil A mix of religious and secular languages compels them to devise new ways of thinking about their role in family church and society      *Select Notes* Mary Abby Thaxter Peloubet, 1900
