

necessary, prior to it overflowing. Install the diaphragm and cover. Tighten the screws finger-tight.

10. Remove the pad pin bolts (Figure 77).

11. Remove the inboard and outboard brake pads from the caliper.

12. Check the brake pads for wear or damage. Measure the thickness of the brake pad friction material. Replace the brake pads if they are worn to the service limit listed in Table 1.

13. Carefully remove any rust or corrosion from the disc.

14. Thoroughly clean the pad pins of any corrosion or debris.

15. Check the friction surface of the new pads for any debris or manufacturing residue. If necessary, clean off with an aerosol brake cleaner.

#### NOTE

*When purchasing new pads, check with the dealer to make sure the friction compound of the new pad is compatible with the disc material. Remove any roughness from the backs of the new pads with a fine-cut file, then thoroughly clean off.*

#### NOTE

*The brake pads are not symmetrical. The pad with one tab (A, Figure 78) must be installed on the outboard side. The pad with two tabs (B, Figure 78) must be installed on the inboard side of the caliper.*

16. Install the outboard pad (Figure 79) into the caliper.

17. Hold the pad in place and install the pad pin bolts (Figure 80) part way in to hold the outboard pad in place.

18. Install the inboard pad (Figure 81) into the caliper.

19. Push the pad pin bolts through the inboard pad (Figure 77) and tighten to the specification in Table 2.

20. Check to make sure there is sufficient brake fluid in the master cylinder reservoir. Top-off if necessary.

21. Untie the brake pedal from the frame and pump the rear brake pedal to reposition the brake pads against the brake disc. Roll the motorcycle back and forth and continue to pump the brake pedal as many times as it takes to refill the cylinders in the calipers and correctly locate the brake pads against the disc.

#### NOTE

*To control the flow of hydraulic fluid, punch a small hole into the seal of a new container of hydraulic (brake) fluid next to the edge of the pour spout. This will help eliminate fluid spillage, especially while adding fluid to the very small reservoir.*

#### WARNING

*Use brake fluid clearly marked DOT 5 from a sealed container. Other types*
