Young Geographers Gert Ruepert, Tijana Ilić, 2023-09-22 This book shows an updated overview of research about human geography topics like urban growth, urban challenges, transportation, landscape, land cover, geospatial analysis, regional planning, local development, cultural geography, tourism, and so on. Between 2020 and 2022, due to COVID-19 and lockdowns worldwide, there were fewer opportunities for young and upcoming researchers to present their state-of-the-art findings at conferences. In order to highlight exceptional research of young geographers during this time, the idea for this book was created. In collaboration with the EGEA alumni foundation for students and young geographers, 12 authors were selected to showcase their scientific work. In addition to that, most of them present amazing maps and figures as outstanding expressions of the need of GIS for geography research.

Beyond BIM Danelle Briscoe, 2015-10-14 Beyond BIM explores the vast and under-explored design potential undertaken by information modeling. Through a series of investigations grounded in the analysis of built work, interviews with leading practitioners, and speculative projects, the author catalogs the practical advantages and theoretical implications of exploiting BIM as a primary tool for design innovation. Organized by information type, such as geographic data, local code, or materials, each chapter suggests a realm of knowledge that can be harvested and imported into BIM to give meaningful specificity to architectural form and space. While highly sustainable, the work documented and envisioned in this book moves well beyond normalization to reveal inventive takes on contemporary practice. Beyond BIM serves as a primary resource for professional architects, from practice researchers and designers engaged in information-related spatial design processes, as well as students and faculties of architecture schools in search of BIM design inspiration. Likewise, those highly attuned to computation and unconventional ways of creating form and space, particularly

built outcomes that utilize BIM will find this book meaningful and essential
