## **Gerontological Nursing 3rd Edition:**

**Matteson & McConnell's Gerontological Nursing** Adrienne Dill Linton, Helen W. Lach, Mary Ann Matteson, 2007

Matteson McConnell's Gerontological Nursing 3rd Edition provides comprehensive research based information on nursing care of older adults. Beginning with the basics, the text uses a systems approach to describe the aging process from wellness to illness. It also describes physiological and psychological aspects of aging in detail as well as assessment and practice in all settings using the nursing process. Each chapter incorporates a research and theory based approach to the aging process. Content is comprehensive and focuses on caring for the older adult. The text examines the differences between normal aging conditions and clinical problems. Conditions, Competencies, and Roles in Gerontological Nursing section focuses on the process that nurses, especially clinical nurse specialists, use to impact gerontological nursing care. Nursing care plans provide the practitioner with nursing care scenarios applied to clinical practice. Expanded content on functional assessment including addressing communication issues, both verbal and non verbal, alerts the reader to vital issues that may affect the patient's plan of care. Color insert visually complements material on the integumentary section as it illustrates some of the major integumentary conditions affecting the gerontologic population. Reflections boxes written by experts across different nursing fields share personal experiences related to the chapter's content. Toward Better Health boxes provide key considerations for promoting healthy lifestyles. Assessment boxes emphasize specific physical tests and observations to make when assessing a patient. Age Related Changes boxes detail the ways in which particular body systems are affected by the aging process. New chapters on End of Life Care, Evidence Based Practice, and Assisted Living Care give the reader a more comprehensive look at gerontological nursing care.

**Gerontological Nursing: Competencies for Care** Kristen L. Mauk, 2022-03-29

The Fifth Edition of Gerontological Nursing takes a holistic approach and teaches students how to provide quality patient care for the older adult, preparing them to effectively care for this population.

**Gerontological Nursing** Patricia A. Tabloski, 2013-05-24

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book.

**GERONTOLOGICAL NURSING 3e** is a comprehensive research based and up to date guide to nursing care for older adults in all settings. It brings together essential information about normal and pathological changes associated with aging, healthy aging, common diseases of aging, and key psychosocial, cultural, and public health issues. Reflecting today's emphasis on evidence based practice and appropriate delivery of scarce healthcare resources, this text presents new best practices and QSEN standards throughout, promoting more effective assessment, diagnosis, planning, and outcome evaluation. The text's multidisciplinary approaches help nurses add life to years, not just extend life. Its coverage of acute and chronic diseases includes nursing implications, atypical presentation, functional implications, pharmacology, evaluation, etiology, risk factors, and complications. The text also includes a full chapter on multisystem diseases. This book supports safe, effective, and appropriate practice in the home, hospitals, long term care, and hospice settings.

Perkins, 2014-08-27 This book has been honed into an elegant compendium This outstanding work should be widely read it is perhaps the best example of an integrative approach to gerontology Score 94 4 stars Doody's Physical Change Aging has been a well respected resource for caregivers ever since it was published in 1978 This updated version carries on the tradition of providing valuable information on the aging process and age related health issues Former First Lady Mrs Rosalynn Carter

This sixth edition of a classic multidisciplinary text for students of gerontology continues to offer practical reader friendly information about the physical changes and common pathologies associated with the aging process. It places special emphasis on the psychological and social implications of these changes in the lives of older adults. The book is distinguished by its thorough focus on anatomy and physiology and common health problems pertaining to each body system. It emphasizes the positive aspects of aging and demonstrates how the elderly population can gain greater personal control through lifestyle changes and preventive health strategies toward the goal of optimal aging. This sixth edition has been thoroughly updated to present new research findings that differentiate normal aging from actual pathology and includes substantially updated information on diagnosis and treatment. It incorporates new data from healthy older adults demonstrating that the aging process is not necessarily as devastating as earlier research had indicated. The book provides new data and guidelines on risk factors, nutrition, preventive measures, interventions, and commonly prescribed medications, and includes expanded treatment of complementary and alternative therapies. Also included is an updated discussion of grief, ethical issues, and funeral options. The book reinforces information with practical applications of aging data. Written for students of gerontology, social work, human services, nursing, medicine, occupational and physical therapy, counseling, and elder law, it presents information that is clearly understandable for those without an extensive background in biology or medicine. Additionally, the book is a useful practitioner's guide and an easily understandable book for family caregivers.

**THIS SIXTH EDITION INCLUDES NEW INFORMATION ON:** Diagnosis and treatment; Behaviors and interventions that promote more control over an individual's aging process; Genetic DNA theories; Dementia and Parkinson's disease; Immunotherapy; Lifelong health disparities; Animal assisted therapy; Prayer and meditation; Pharmacogenetics; Geragogy; self directed learning; Caregiver health as a public health issue; Natural funerals; biodegradable caskets; burial urns; dying at home.
