Kingdom Within is the title that i have specifically chosen for this book in an attempt to illustrate just that Why Because many still believe that the Kingdom or to be more precise The Kingdom of God is a physical abode that is situated outside of ourselves and in order to attain it many penances are to be experienced before an austere deity so that punishment may be avoided In this book the author has obliterated all biases and prejudices that pertain to religion and has henceforth substituted them with the humble metaphysical teachings of Jesus so that one may discover the ONENESS within and in all that is Based upon this premise the Kingdom becomes a part of who we are not something that we ought to anticipate for at the end of our earthly life

*The Ontogeny of Information* Susan Oyama,2000-03-16 The Ontogeny of Information is a critical intervention into the ongoing and perpetually troubling nature nurture debates surrounding human development Originally published in 1985 this was a foundational text in what is now the substantial field of developmental systems theory In this revised edition Susan Oyama argues compellingly that nature and nurture are not alternative influences on human development but rather developmental products and the developmental processes that produce them Information says Oyama is thought to reside in molecules cells tissues and the environment When something wondrous occurs in the world we tend to question whether the information guiding the transformation was pre encoded in the organism or installed through experience or instruction Oyama looks beyond this either or question to focus on the history of such developments She shows that what developmental information does depends on what is already in place and what alternatives are available She terms this process constructive interactionism whereby each combination of genes and environmental influences simultaneously interacts to produce a unique result Ontogeny then is the result of dynamic and complex interactions in multileveled developmental systems The Ontogeny of Information challenges specialists in the fields of developmental biology philosophy of biology psychology and sociology and even nonspecialists to reexamine the existing nature nurture dichotomy as it relates to the history and formation of organisms
