Human Respiratory System

- Human respiratory system consists of a pair of nostrils, pharynx, larynx, bronchi and bronchioles that finally terminates into alveoli.
- Nasal chamber** open into pharynx that leads to **larynx**. Larynx contains voice box (sound box) that help in sound production.
- The trachea, primary, secondary and tertiary bronchi and initial bronchioles are supported by **incomplete cartilaginous rings** to prevent collapsing in absence of air.
- Each bronchiole terminates into an irregular walled, vascularized bag like structure called **alveoli**.

- The branching network of bronchi, bronchioles and alveoli collectively form the lungs.
- Two lungs are covered with double layered **pleura** having pleural fluid between them to reduce the friction on lung surface.

Yes, most PDF viewers/editors like Adobe Acrobat, Preview (on Mac), or various online tools allow you to fill out forms in PDF files by selecting text fields and entering information. Are there any restrictions when working with PDFs? Some PDFs might have restrictions set by their creator, such as password protection, editing restrictions, or print restrictions. Breaking these restrictions might require specific software or tools, which may or may not be legal depending on the circumstances and local laws.
