in a group empathize with others develop self control and give and receive feedback all while becoming confident readers and writers As Buckley shares Every day we ask young children to respectfully converse question debate and collaborate about literature science math problems history and more That s sophisticated stuff and requires sophisticated skills Social and emotional skills are essential to helping children communicate their knowledge and articulate their questions We must teach students how to build respectful caring classroom communities where students are supported and fully engaged in the learning and everyone can reach their potential In this fresh and original book Buckley captures the humor wonder honesty and worries of our youngest learners and helps teachers understand how to harness their creativity and guide their conversations toward richer expressions of knowledge Teachers of special populations will especially appreciate Buckley s successful strategies for reaching English language learners and children from high poverty homes who may not have strong foundations for academic discourse As Buckley reminds us By understanding one another orally and socially at first then using those community building exchanges to strengthen the skills of reading and writing we experience the authentic pride and sweet joys of learning understanding and connecting to one another **Restoring Opportunity** Greg J.

Duncan, Richard J. Murnane, 2014-01-01 In this landmark volume Greg J Duncan and Richard J Murnane lay out a meticulously researched case showing how in a time of spiraling inequality strategically targeted interventions and supports can help schools significantly improve the life chances of low income children The authors offer a brilliant synthesis of recent research on inequality and its effects on families children and schools They describe the interplay of social and economic factors that has made it increasingly hard for schools to counteract the effects of inequality and that has created a widening wedge between low and high income students Restoring Opportunity provides detailed portraits of proven initiatives that are transforming the lives of low income children from prekindergarten through high school All of these programs are research tested and have demonstrated sustained effectiveness over time and at significant scale Together they offer a powerful vision of what good instruction in effective schools can look like The authors conclude by outlining the elements of a new agenda for education reform Restoring Opportunity is a crowning contribution from these two leading economists in the field of education and a passionate call to action on behalf of the young people on whom our nation s future depends Copublished with the Russell Sage Foundation Resources in Education ,1983 Directions ,1979 *Canadian Journal of Forest Research* ,2015
