Elizabeth Gray,Lynn Hamilton,2016-04-14 Accounting often described as the language of business requires a diverse set of written listening and oral communication skills if those who practise it are to be effective Given the pace of change relating to for example the evolution of international accounting standards and the demands for greater transparency accountants must be clear responsive and audience focussed communicators Employers of accountants consistently comment on the need for their new graduate recruits and trainees to have strong written oral and interpersonal communication skills In this light accounting educators face the challenge of designing and delivering programmes that reflect professional expectations on the part of employers and clients and educating students on how to make informed communication choices in order to achieve desired results and to build good working relationships The chapters in this book deal with such topics as accounting students perceptions of oral communication skills competence based writing skills and the development of listening skills This book was originally published as *Accounting Education* an international journal **Rethinking Value-Added Models in Education** Audrey Amrein-Beardsley,2014-04-24 Since passage of the of No Child Left Behind Act in 2001 academic researchers econometricians and statisticians have been exploring various analytical methods of documenting students academic progress over time Known as value added models VAMs these methods are meant to measure the value a teacher or school adds to student learning from one year to the next To date however there is very little evidence to support the trustworthiness of these models What is becoming increasingly evident yet often ignored mainly by policymakers is that VAMs are 1 unreliable 2 invalid 3 nontransparent 4 unfair 5 fraught with measurement errors and 6 being inappropriately used to make consequential decisions regarding such things as teacher pay retention and termination Unfortunately their unintended consequences are not fully recognized at this point either Given such the timeliness of this well researched and thoughtful book cannot be overstated This book sheds important light on the debate surrounding VAMs and thereby offers states and practitioners a highly important resource from which they can move forward in more research based ways
