Notozi Jennifer Mgobozi is 'n 75-jarige ouma van vyf (5.1.1) (kleinkinders). Sy het in (5.1.2) (November) 2021 haar meestersgraad in onderwys aan die Walter Sisulu Universiteit behaal. Jennifer is al (5.1.5) (baie) as 40 jaar lank betrokke by onderwys. Sy werk by NECT, wat probeer (5.1.6) (onderwys in SA verbeter). (5.1.7) (Sy doen juis haar navorsing oor NECT se program vir Engels as EAT). Sy sal (5.1.8) (bly) wees as haar navorsing 'n positiewe effek op onderwys het; veral in die landelike gebiede. 5

Jennifer sê studies en opleiding het (5.1.9) (iets met ouderdom te doen). Sy sê daar is nou baie (5.1.10) (geleentheid). As jy (5.1.11) (dus/dis) kan, moet jy dit doen. Daarom is sy nie van plan om gou af te tree nie. Inteendeel! (5.1.12) (Sy wil verwerf met lof haar doktorsgraad volgende jaar). 10

Jennifer is 'n (5.1.13) (inspireer) vir ander. Sy het bewys: (5.1.14) Waar 'n wil is is 'n weg! 15

World Yearbook of Education

2003 Jill Bourne, Euan Reid, 2003-12-16 The issues raised by the role of language in education are some of the most important and contentious faced by education systems across the globe. Language is embedded in the concepts of nationhood and identity and is therefore directly linked to the very social and political fabric of a country. In a climate of increasing globalisation, development and mobility of populations, nations around the world are concerned with the tension between cultivating a sense of cultural and linguistic cohesion and making use of the linguistic diversity that exists in every country and region. This book examines the implications and impacts, the dilemmas and potential for language education in relation to education systems and wider society. Split into three key parts, it considers current issues in language education including the role of language in maintaining power and inequalities, in encouraging participation and inclusion, and in challenging the status quo. Different approaches to language education around the world, the potential for language to provide opportunities for the disadvantaged, illustrated by case studies of three cities. This recent volume of the internationally respected World Yearbook of Education continues the tradition of offering a wide range of international perspectives from leading commentators on a universal concern. The material amassed here will be essential reading for teacher educators, education researchers and school leaders across the world.

The Selfless Constitution Stu Woolman, 2021-07-28 Do you possess freedom, the will to do as you choose as an individual as a participant in social affairs or as a citizen in the political realm? Well, no. Not really. At least not as most of us understand a term loaded down with metaphysical baggage. Don't worry. You've got something better: a neurological system capable of carrying out the most complex analytical and computational tasks, membership in innumerable communities that provide you with huge stores of knowledge and wisdom, and a politico-constitutional order that ought to provide the material and the immaterial conditions that will enable you to pursue a life worth valuing. Drop the simplistic folk psychology of unfettered freedom whilst holding on to intentionality, and you might be inclined to adopt a set of social practices and political arrangements that enhance the chances that you and your compatriots will flourish. As many recent studies of consciousness reveal, our neurological systems are complex feedback mechanisms designed to create myriad for trial and error, and if you survive, the production of new

stores of knowledge Individuals comprised of numerous radically heterogeneous naturally and socially determined selves are always experimenting attempting to divine through reflection and action what works best even when best means fully embracing who we already are Choice architects those persons charged with constructing the environments within which we operate daily should if responsible regularly run experiments that attempt to eliminate biases and ultimately deliver norms that nudge us away from negative defaults toward more optimal ends A constitutional democracy made up of millions of radically heterogeneous densely populated individuals constantly strives to determine what works best for most of its many constituents Because South Africa's Constitution states at an extremely high level of generality only some of the norms that govern our lives it remains for citizens representatives and judges to create doctrines and institutions that serve its capaciously framed ends best After canvassing the relevant literature in neuroscience empirical philosophy behavioural psychology social capital theory development economics and emergent experimental governance this work suggests that manifold experiments in living that fall within the accepted parameters of our shared constitutional norms are likely over time to produce more optimal ways of being that can be replicated by other members of our polity Our reflexive stance toward best practices a linchpin of this book's take on experimental governance when inextricably linked to a commitment to flourishing and to the expansion of individual capabilities should cause us to alter the content of the fundamental norms that shape our lives and bind us to one another A political order founded upon experimental constitutionalism and flourishing promises an egalitarian pluralist reformation of South African society The book spins out its novel thesis against the concrete backdrop of political arrangements and judicial doctrines that have emerged during the first 20 years of our truly vibrant constitutional democracy Its trenchant analysis of political institutions and constitutional case law shows us how far we have come and how far we still have to go
