first two stages of the OPI and these physical signs of test anxiety were considerably less frequent in the final part of the OPI. The causes and types of anxiety reported by the students ranged from language learning difficulties problems trying to retrieve appropriate English vocabulary code switching from Arabic language to English and vice versa differences in social status of the teachers language instructors and unfamiliarity with the interlocutor. The pedagogical implications of these findings for understanding anxiety and oral test anxiety with second language students for teachers schools and examination boards are discussed as are suggestions for future research. Furthermore considering the important role of teachers in second language pedagogy and the use of English as the main language of instruction this study also offers suggestions to lessen anxiety for oral class activities and oral assessments and presents test taking strategies. *X-kit Literature Series: FET To Kill a Mockingbird*, 2005.
