Nordic Food Transitions Jesper Manniche, Bjornar Saether, 2018-12-07 The ambition of the book is to investigate a possible transition in the markets for food in the Nordic countries Six chapters from various disciplinary traditions study change and innovation within the food sectors in Denmark Sweden and Norway while an introductory chapter discusses the findings of these analyses Specialty food has established a strong position within product categories such as craft beer in Denmark and organic food in Sweden but has failed to do so in others The emergence of markets for specialty foods have been promoted by top down policy initiatives and bottom up entrepreneurial efforts Far from providing the only relevant platform for food transition and innovation the New Nordic Food manifesto has helped creating a territorialized action space for networks of food producers and distributors promoting diversity in local food and rural development Some of the specialty food networks have succeeded in re scaling their

operations from a local to a national market Today even large retailers and food processing companies have to pay notice to the ongoing changes among consumers There is however a paradoxical constraint in a transition towards specialty food A large scale transition would imply that producers and consumers abandon precisely what constitute them their exclusiveness The chapters were originally published in a special issue of *European Planning Studies* **Concentrate Questions and Answers Tort Law** Karen Dyer, Anil Balan, 2022 Concentrate Q the content is exceptional Wendy Chinenye Akaigwe London Metropolitan University Take it online The 2nd edition is available in paperback or e book Visit www.oup.com/lawrevision for multimedia resources to help you with revision and assessment **Judicial Review of Administrative Action** Swati Jhaveri, Michael Ramsden, 2021-03-18 Explores the English origins of the principles of judicial review in common law jurisdictions and autochthonous pressures for their adaptation **Corporate Governance in Central Europe and Russia** Maria Aluchna, Samuel O. Idowu, Irina Tkachenko, 2020-03-04 This book examines corporate governance through a holistic lens that integrates financial social and environmental goals e g increasing transparency and disclosure In addition it investigates the theoretical assumptions guiding the current corporate governance practices adopted by companies in Central Europe and Russia The book presents a dynamic study on the evolution of corporate governance systems which were practically non existent just 30 years ago In turn it addresses criticism leveled at corporate governance its impact on the outbreak of the financial crisis and recommendations for changes after the crisis The book employs a regional focus exploring a group of countries that have often been neglected in corporate governance research Carefully selected data and a variety of case studies prepared by leading authors from the region provide evidence to support the analysis ***Japanese Political Economy Revisited*** David Chiavacci, Sébastien Lechevalier, 2020-11-25 During the last 30 years the Japanese political economy system has experienced significant changes that are usually not well understood or analysed because of their complexity and contradictions This book provides new analyses and insights on the process of evolving Japanese political economy including Japan s current economic policy known as Abenomics The first three chapters look at evolutions at the corporate level characterised in recent years by increasing firm heterogeneity The authors apply theoretically driven analyses to the complex subject of corporate governance human resource management and corporate reporting by discussing new developments in context of their economic opportunities as well as of their institutional contradictions with continuities in Japanese business practices The second group of chapters deals with institutional changes and evolving economic reforms on the macro level of political economy The two chapters focus on the financial system regulation and economic growth policies as two central elements of Japan s political economy and key drivers in the evolution of its economy Their analysis allows us to better understand the interplay between reforms and change in consumption credit and to reinterpret Abenomics as a manifestation of ongoing contradictions within the Japanese political economy The chapters were originally published in a special issue in *Japan Forum* **Achieving Science with CubeSats** National Academies of Sciences,

Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Achieving Science Goals with CubeSats, 2016-11-06 Space based observations have transformed our understanding of Earth its environment the solar system and the universe at large During past decades driven by increasingly advanced science questions space observatories have become more sophisticated and more complex with costs often growing to billions of dollars Although these kinds of ever more sophisticated missions will continue into the future small satellites ranging in mass between 500 kg to 0.1 kg are gaining momentum as an additional means to address targeted science questions in a rapid and possibly more affordable manner Within the category of small satellites CubeSats have emerged as a space platform defined in terms of 10 cm x 10 cm x 10 cm sized cubic units of approximately 1.3 kg each called U s Historically CubeSats were developed as training projects to expose students to the challenges of real world engineering practices and system design Yet their use has rapidly spread within academia industry and government agencies both nationally and internationally In particular CubeSats have caught the attention of parts of the U S space science community which sees this platform despite its inherent constraints as a way to affordably access space and perform unique measurements of scientific value The first science results from such CubeSats have only recently become available however questions remain regarding the scientific potential and technological promise of CubeSats in the future Achieving Science with CubeSats reviews the current state of the scientific potential and technological promise of CubeSats This report focuses on the platform s promise to obtain high priority science data as defined in recent decadal surveys in astronomy and astrophysics Earth science and applications from space planetary science and solar and space physics heliophysics the science priorities identified in the 2014 NASA Science Plan and the potential for CubeSats to advance biology and microgravity research It provides a list of sample science goals for CubeSats many of which address targeted science often in coordination with other spacecraft or use sacrificial or high risk orbits that lead to the demise of the satellite after critical data have been collected Other goals relate to the use of CubeSats as constellations or swarms deploying tens to hundreds of CubeSats that function as one distributed array of measurements

International Practices to Promote Budget Literacy Harika Masud, Helene Pfeil, Sanjay Agarwal, Alfredo Gonzalez Briseno, 2017-08-09 Budget literacy is defined as the ability to read decipher and understand public budgets to enable and enhance meaningful citizen participation in the budget process It is comprised of two main parts i a technical understanding of public budgets including familiarity with government spending tax rates and public debt and ii the ability to engage in the budget process comprising of practical knowledge on day to day issues as well as an elementary understanding of the economic social and political implications of budget policies the stakeholders involved and when and how to provide inputs during the annual budget cycle Given that no international

standards or guidelines have been established for budget literacy education to date this book seeks to address this gap by taking stock of illustrative initiatives promoting budget literacy for youth in selected countries The underlying presumption is that when supply side actors in the budget process governments simplify and disseminate budget information for demand side actors citizens this information will then be used by citizens to provide feedback on the budget However since citizens are often insufficiently informed about public budgets to constructively participate in budget processes one way to empower them and to remedy the problem of budget illiteracy is to provide budget literacy education in schools to youth helping them evolve into civic minded adults with the essential knowledge needed for analyzing their government's fiscal policy objectives and measures and the confidence and sense of social responsibility to participate in the oversight of public resources This book elaborates on approaches learning outcomes pedagogical strategies and assessment approaches for budget literacy education and presents lessons that are relevant for the development improvement or scaling up of budget literacy initiatives
