Thousands of years ago, the first pearl was probably discovered while human beings were searching for food at the sea shore. Throughout history the pearl with its shine has been one of the most highly valued gems. Pearls have been mentioned many times in religious texts and mythologies from the earliest times. The ancient Egyptians valued pearls so much that they were buried with them. It is said that, the famous queen of Egypt Cleopatra would dissolve a pearl in a glass and drink it as a sign of love and respect for the entire nation. The Greeks thought the pearls as a sign of wealth and social position. The beauty of pearls was associated with love and marriage. In ancient Rome, pearls were considered the greatest sign of wealth and social status. At that time the young women of noble families loved to wear beautiful pearl necklaces. The brave knights used to wear them in the battles for good luck.

Authors consider how courts have taken on regulating fundamental categories of inclusion and exclusion including citizenship rights. Courts centrality to governance is addressed in sections on judicial processes, sub-national courts and political accountability, all analyzed in multiple legal political systems. Other chapters turn to analyzing the worldwide push for diversity in staffing courts. Finally, the digitization of records changes both court processes and studying courts.
