

A Short Speech on Leadership

By Tom Coyne

Thank you for inviting me here today to talk about leadership – an issue that is absolutely central to our ability to thrive in a world of increasing complexity and accelerating change.

Let me start with the big picture. Since humans first banded together on the east African plain eons ago, evolutionary selection has primarily operated on groups, not individuals. Teams win and lose. Companies succeed and fail. And nations and empires rise and fall. For this reason, group leadership is critical.

To survive and thrive, every organization must competently execute four processes. Three of them are relatively easy to describe.

- Strategy is about sensemaking and design. The former seeks to identify the key elements in the situation facing an organization, how they are related, and how they are likely to evolve in the future. The result is assumptions that form the basis for the design process – determining how to achieve desired goals with available means.
- Execution implements this strategic design, by developing objectives, metrics, plans, budgets, processes, systems, organization and mechanisms to provide feedback and drive adaptation.
- Finally, risk management ensures survival by identifying and assessing risks and uncertainties, providing warning of adverse changes, mitigating and transferring loss exposures, and strengthening organizational resilience and adaptive capabilities.

However, excellent strategy, execution, and risk management alone won't deliver survival and success. They need leadership to integrate and animate them. But just what is leadership about?

At the most basic level, we need to distinguish between dominance and leadership. In some groups, a dominant individual will seize power and assert control. This is the world of animal herds, of palace intrigue, authoritarian dictatorships, and mafia families. However, while these situations all make for great television, dominance isn't leadership. Rather, over the years I've become more focused on the nature of leadership as a relationship – an honor that is bestowed upon a person by followers who are willing to place their trust in them.

Leader Sarah M. Marshall, Anne M. Hornak, 2023-07-03 Sarah Marshall and Anne Hornak have done a magnificent job exploring diverse contexts in which college students expand their individual leadership capacity and learn and practice engaging in relational leadership with others These cases are realistic because they were gathered from their interviews with real students engaging in leadership From whatever perspective students can learn that they are doing leadership when they work with others to address shared issues solve shared problems and work toward positive change from the Foreword by Susan R Komives This book presents over 230 case studies that reflect typical issues faced by undergraduate student leaders The scenarios cover the range of functional areas of student life These cases are intended for use by faculty and student affairs professionals as training tools for new student leaders who generally receive little preparation before assuming their positions Cases provide an opportunity for students to roleplay and discuss scenarios before they encounter potentially similar events in their daily lives as leaders engage students intensely in their learning as they work through the issues and problems and promote meaningful dialogue and discussion of relevant theory The cases are based on real life dilemmas and reflect both contemporary and historical campus issues They are derived from interviews with 110 undergraduates and 11 student affairs administrators from large public research institutions small privates community colleges and mid sized comprehensive schools The book begins with guidance on how to use case studies effectively and on how to incorporate theory in analyzing them The cases are then grouped into chapters each of which focuses on a particular type of student organization The cases vary in length to allow for multiple uses Shorter cases can be role played and discussed in leadership training workshops while longer cases can be used as take home assignments or debated during longer training sessions The book concludes with general advice for student leaders To assist with the facilitation process the authors provide discussion questions to begin the analysis of each case The cases are written broadly enough to allow for a variety of possible solutions
