BACKGROUND INFO

Animals need body heat! Not too much and not too little. Think about us as mammals, our body works hard to keep a constant temperature of 37 degrees Celsius (98.6 degrees Fahrenheit.) If our temperature raises a few degrees, we feel sick and may even die! All other animals must also maintain a certain body temperature to stay alive.

Animals can be divided into two groups according to the methods used to maintain body temperature:

Endotherms (Meaning "inside heat") Sometimes called warm-blooded. Produce heat within their own bodies to stay constant. Includes: mammals (like us!) and birds.

Ectotherms: (Meaning "outside heat") Sometimes called cold-blooded. Must obtain heat from the outside environment. Their body temperatures are raised and lowered by the temperature outside. These animals have numerous ways to warm up or cool down. To raise body temperature, they often bask in the sun or show the board side of their

body to the sun. If they are too warm, they will dash into the shade or burrow into the ground.

MATERIALS NEEDED

- ❖ 1 Celsius thermometer for each team. (best with metal back)
- ❖ Masking tape
- ❖ Stop watch
- ❖ Set of 8 arthropods for each team (See copy page. Make a different color for each team to avoid confusion)
- ❖ Rope to mark boundaries (optional)

Lizard And The Sun Lesson Plans
