Division Word Problems

Sofia and Tukker are hosting a Halloween Costume Party for all of their friends and they have a long list of tasks to complete as they prepare for the event.

- 1.) Sofia purchased a total of 74 balloons for the party. If she plans on keeping balloons together in sets of 3 and she wants to blow up as many balloons as possible, how many balloons will she not have to blow up?

- 2.) Tukker baked 99 spooky cupcakes and placed them on black trays in the living room. If each tray is 8 inches wide and can hold a maximum of 7 cupcakes, how many trays can be completely filled?

- 3.) Finally, Sofia and Tukker are ready to prepare goodie bags filled with candy to share with their guests. If they have a total of 210 pieces of candy and they want each bag to contain exactly ten pieces of candy, how many goodie bags can they make? Will there be any candy left over?

This volume provides new insights on creativity while focusing on innovative methodological approaches in research and practice of integrating technological tools and environments in mathematics teaching and learning. This work is being built on the discussions at the mini symposium on Creativity and Technology at the International Conference on Mathematical Creativity and Giftedness (ICMCG) in Denver, USA, 2014, and other contributions to the topic. The book emphasizes a diversity of views, a variety of contexts, angles, and cultures of thought, as well as mathematical and educational practices. The authors of each chapter explore the potential of technology to foster creative and divergent mathematical thinking, problem solving, and problem posing; creative use of dynamic, multimodal, and interactive software by teachers and learners; as well as other digital media and tools while widening and enriching transdisciplinary and interdisciplinary connections in the mathematics classroom. Along with ground-breaking innovative approaches, the book aims to provide researchers and practitioners with new paths for diversification of opportunities for all students to become more creative and innovative mathematics learners. A framework for dynamic learning conditions of leveraging mathematical creativity with technology is an outcome of the book as well. **1977**
