**Transformational Literacy** Ron Berger, Libby Woodfin, Suzanne Nathan Plaut, Cheryl Becker Dobbertin, 2014-08-18. Engage, challenge and inspire students with work that matters. Transformational Literacy, written by a team from EL Education, helps teachers leverage the Common Core instructional shifts: building knowledge through content-rich nonfiction reading; for and writing with evidence; and regular practice with complex text to engage students in work that matters. Worthy texts and worthy tasks help students see the connection between their hard work as readers and writers and their capacity to contribute to stronger communities and a better world. The stories, examples and resources that permeate Transformational Literacy come primarily from the more than 150 EL Education schools around the country that support teachers to select, supplement, customize and create curriculum and improve instruction. The book also draws on EL Education's open-source Common Core English Language Arts curriculum, often cited as one of the finest in the country, and professional development offered to thousands of teachers to implement that curriculum effectively. Transformational Literacy combines the best of what EL Education knows works for kids: purposeful inquiry-based learning and the new imperative of the Common Core: higher and deeper expectations for all students. Teach standards through a compelling and purposeful curriculum that prioritizes worthy texts and worthy tasks. Improve students' evidence-based reading, thinking, talking and writing. Support students to develop a new mindset toward the challenge of reading complex texts. Transformational Literacy introduces an approach to literacy instruction that will engage, challenge and inspire students with work that matters.

**The Critical Merits of Young Adult Literature** Crag Hill, 2014-03-05. This examination of the literary effectiveness of young adult literature from a critical research-oriented perspective answers two key questions asked by many teachers and scholars in the field: Does young adult literature stand up on its own as literature? Is it worthy of close study? The treatment is both conceptual and pragmatic. Each chapter discusses a topical text set of YA novels in a conceptual framework; how these

novels contribute to or deconstruct conventional wisdom about key topics from identity formation to awareness of world issues while also providing a springboard in secondary and college classrooms for critical discussion of these novels. Uncloaking many of the issues that have been essentially invisible in discussions of YA literature, these essays can then guide the design of curriculum through which adolescent readers hone the necessary skills to unpack the ideologies embedded in YA narratives. The annotated bibliography provides supplementary articles and books germane to all the issues discussed. Closing End Points highlight and reinforce cross-cutting themes throughout the book and tie the essays together.

The Indian and Christian Miracles of Walking on the Water William Norman Brown, 1928. *Internationalizing Rural Science Teacher Preparation* Gayle A. Buck, Vesna Dimitrieska, Valarie L. Akerson, 2023-11-23. This edited volume discusses the need to increase quantity and enhance quality of science education focused on preparing rural students to thrive in an interconnected, interdependent, and complex world. It acknowledges that globally integrated education incorporates local knowledge and culture with global trends. Additionally, it highlights that globally competent science teaching is not included in most preparation programs and teachers enter schools unprepared to address students' needs. Rural schools lack opportunities to keep up with reform efforts and may have limited experiences with diversity, particularly at the global level. These chapters describe globalization in authors' respective academic institutions by sharing global competence action research projects for preservice teachers. The studies presented were conducted in elementary and secondary science methods and science content courses. The book's research is unique as the contributors have carried out action research in science teacher preparation programs and participated in peer

discussions that helped them fill gaps in global science teaching while advancing the field of teacher preparation programs
