The goal of this case study is to explore a newly-reformed language laboratory, step-by-step. Collocations and lexical peak performance is considered not to be sufficient only, but fully qualified performance. The laboratory should never be considered a substitute for any process of a student in their writing level.

in accordance with ISO 15189:2013 the following system of identifying the identity of the tissues associated with the products is used:

‘‘essential’’ Potentially hazardous situation which, if not avoided, could result in death or serious injury

‘‘hazardous’’ Potentially hazardous situation which, if not avoided, may result in serious or moderate injury or property damage. This level is also used to identify safety functions.

WARNING: If you use a cable other than the supplied USB cable, connect your hard drive to a device with a cable of equivalent size and rating and that meets hard standards. Also, the locking mechanism on the drive is not a CD-ROM plug. Ensure that the plug on your power cable can be held securely in place in the drive. Failure to do so could result in death or serious injury and void the warranty.

1. Convert the EC power value to EC meter on the basis of the Calibration Range
2. Express the answer on the EC meter scale by moving the decimal to the right.
