Army Research Office, 1961 **Army Research Task Summary**, 1961 **Woodrow Wilson's Wars** Mark Benbow, 2022-10-15 Woodrow Wilson's presidential administration 1913-1921 was marked not only by America's participation in World War I but also by numerous armed interventions by the United States in other countries Spanning the globe these actions included the years long occupations of Haiti and the Dominican Republic a border war with Mexico and the use of Marines guarding American citizens during unrest in Chinese cities Author Mark Benbow examines what these American policy decisions and military adventures reveal of Wilson as commander in chief and the powers and duties of the office Wilson tended to let his cabinet officials operate their own departments as they wished as long as their actions did not contradict his overall policies However as regards foreign policy Wilson took an active role overseeing American diplomats His policy toward the military followed a similar

**International Bibliography of Economics** British Library of Political and Economic Science,1993 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences **The Economics Anti-Textbook** Rod Hill,Tony Myatt,2010-03-11 Mainstream textbooks present economics as an objective science free from value judgements that settles disputes by testing hypotheses that applies a pre determined body of principles and contains policy prescriptions supported by a consensus of professional opinion The Economics Anti Textbook argues that this is a myth one which is not only dangerously misleading but also bland and boring It challenges the mainstream textbooks assumptions arguments models and evidence It puts the controversy and excitement back into economics to reveal a fascinating and a vibrant field of study one which is more an art of persuasion than it is a science The Economics Anti Textbook s chapters parallel the major topics in the typical text beginning with a boiled down account of them before presenting an analysis and critique Drawing on the work of leading economists the Anti Textbook lays bare the blind spots in the texts and their sins of omission and commission It shows where hidden value judgements are made and when contrary evidence is ignored It shows the claims made without any evidence and the alternative theories that aren t mentioned It shows the importance of power social context and legal framework The Economics Anti Textbook is the students guide to decoding the textbooks and shows how real economics is much more interesting than most economists are willing to let on Globalization, Privatization and Free Market Economy C. Rao,1998-06-25 The three dominant forces shaping societies and economies around the world are globalization privatization and liberalization Because these processes are interrelated they must be addressed collectively The contributors to the volume show that globalization privatization and liberalization are multidimensional phenomena that impact not only the economic considerations of governments but also sociocultural and environmental aspects of societies The three phenomena also affect these units of analysis which Rao and his colleagues identify as regional country industrial and organizational The result is a cogent discussion of these powerful global forces for the academic community professionals in economic development banking finance international investment and global commerce After treating the conceptual issues of meaning definition and differing interpretations and perspectives the volume examines the historical experience with regional economic integration The flow of foreign direct investment a major consequence of globalization privatization and liberalization of economies is considered next This leads to a study of the challenges created for management at the microlevel in organizations such as the intensification of competitiveness and the increased importance of technology and

technology management In their examination of country specific issues the contributors show how widely experiences vary with regard to the way in which the three major processes are implemented and how the policies behind them are adopted Finally in their discussion of sectoral and industry specific issues the contributors note that great variations on how different industrial sectors and industries will approach and recreate themselves under the power of the three great processes
