

SECTION II - RIGHT HAND SIDE ELEMENTS

This section covers servicing of the assemblies on the right hand side of the saw. (Figure 2-1): (A) Spikes, (B) starter assembly, (C) clutch assembly, with drive and sprocket or drive and gear, (D) chain location adjustment, (E) automatic idler and transmission in gear drive saws, (F) spark arrester mufflers and (G) Power Sharp mechanisms.

SPIKE

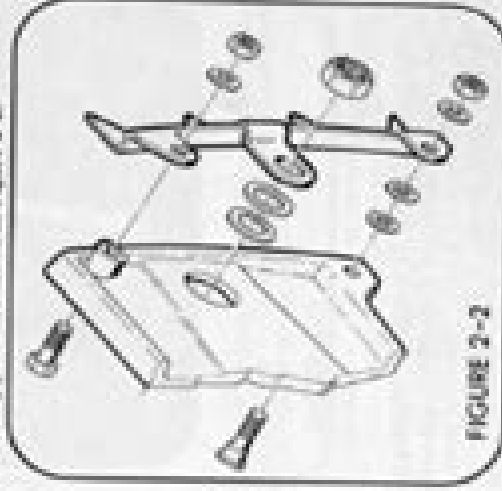

Spikes were supplied with some of the models in this series. Spikes for saws which did not have spikes, have been available as indicated in the respective illustrated parts lists for the saws. Where necessary, instruction sheets accompany each kit. The instructions should be followed carefully.

If the spike installed on a saw is damaged, a new spike should be installed.

Direct Drive Saw

Early models of some direct drive saws of this series used a clutch gear which was not drilled for installation of a spike. When installing a spike on these modified clutch gears, follow the instructions accompanying this

FIGURE 2-1 and FIGURE 2-2. Build the instruction sheet set to be available, the correct method of installation and the necessary parts are shown in Figure 2-2.
