Hydrocarbon Chemistry George A. Olah,Árpád Molnár,2003-09-10 Hydrocarbons and their transformations play major roles in chemistry as raw materials and sources of energy Diminishing petroleum supplies regulatory problems and environmental concerns constantly challenge chemists to rethink and redesign the industrial applications of hydrocarbons Written by Nobel Prize winner George Olah and hydrocarbon expert Árpád Molnár the completely revised and expanded Second Edition of *Hydrocarbon Chemistry* provides an unparalleled contemporary assessment of the field presenting basic concepts current research and future applications *Hydrocarbon Chemistry* begins by discussing the general aspects of hydrocarbons the separation of hydrocarbons from natural sources and the synthesis from C1 precursors with recent developments for possible future applications Each successive chapter deals with a specific type of hydrocarbon transformation The Second Edition includes a new section on the chemical reduction of carbon dioxide focusing on catalytic ionic electrocatalytic photocatalytic and enzymatic reductions as well as a new chapter on new catalysts and activation methods combinatorial chemistry and environmental chemistry Other topics covered include Major processes of the petrochemical industry such as cracking reforming isomerization and alkylation Derivation reactions to form carbon heteroatom bonds Hydrocarbon oxidations Metathesis Oligomerization and polymerization of hydrocarbons All chapters have been updated by adding sections on recent developments to review new advances and results Essential reading for practicing scientists in industry polymer and catalytic chemists as well as researchers and graduate students *Hydrocarbon Chemistry* Second Edition remains the benchmark text in its field **McGraw-Hill Encyclopedia of Science and Technology** ,1971 **Petroleum**

Refining Design and Applications Handbook, Volume 1 A. Kayode Coker,2018-09-05 There is a renaissance that is occurring in chemical and process engineering and it is crucial for today's scientists engineers technicians and operators to stay current With so many changes over the last few decades in equipment and processes petroleum refining is almost a living document constantly needing updating With no new refineries being built companies are spending their capital retooling and adding on to existing plants Refineries are like small cities today as they grow bigger and bigger and more and more complex A huge percentage of a refinery can be changed literally from year to year to account for the type of crude being refined or to integrate new equipment or processes This book is the most up to date and comprehensive coverage of the most significant and recent changes to petroleum refining presenting the state of the art to the engineer scientist or student Useful as a textbook this is also an excellent handy go to reference for the veteran engineer a volume no chemical or process engineering library should be without Written by one of the world's foremost authorities this book sets the standard for the industry and is an integral part of the petroleum refining renaissance It is truly a must have for any practicing engineer or student in this area *Guidelines for Fire Protection in Chemical, Petrochemical, and Hydrocarbon Processing Facilities* CCPS (Center for Chemical Process Safety),2010-08-13 While there are many resources available on fire protection

and prevention in chemical petrochemical and petroleum plants this is the first book that pulls them all together in one comprehensive resource This book provides the tools to develop implement and integrate a fire protection program into a company or facility s Risk Management System This definitive volume is a must read for loss prevention managers site managers project managers engineers and EHS professionals Note CD ROM DVD and other supplementary materials are not included as part of eBook file *Glencoe Science* McGraw-Hill Staff,2001-06 **Encyclopedia of Chemical Processing** Sunggyu Lee,2006 Supplying nearly 350 expertly written articles on technologies that can maximize and enhance the research and production phases of current and emerging chemical manufacturing practices and techniques this second edition provides gold standard articles on the methods practices products and standards recently influencing the chemical industries New material includes design of key unit operations involved with chemical processes design unit operation and integration of reactors and separation systems process system peripherals such as pumps valves and controllers analytical techniques and equipment current industry practices and pilot plant design and scale up criteria **McGraw-Hill Books, Including the Publications of Whittlesey House** McGraw-Hill Book Company,1940 **Journal of Industrial and Engineering Chemistry** ,1922 The Journal of Industrial and Engineering Chemistry ,1922 Field Measurement Technologies for Total Petroleum Hydrocarbons in Soil , **Catalog of Copyright Entries. well being and environmental health for present and future generations Nevertheless obstacles exist in reaching these objectives For instance the vital goals of ensuring a clean environment face threats due to the ongoing contamination of both aquatic and terrestrial ecosystems with top priority pollutants with petroleum hydrocarbons being the foremost among them In today s fast paced society environmental deterioration is an ecumenical concern This predicament is intricately linked to unregulated human activities giving rise to substantial planet problems Among these petroleum waste whether released through spills leaks from underground tanks tankers oil well blowouts or abandoned refinery sites leads to extensive contamination of surface soils groundwater seas and oceans resulting in damage to ecosystems Additionally several industries generate a substantial amount of hydrocarbon waste during crude oil processing To date various conventional methods have been employed to address these environmental hydrocarbon wastes In bygone days technological advancements haven t necessarily reduced the rate of consumption of resources for a high quality lifestyle However from both economic and environmental perspectives biological treatment stands out as the most efficient approach with co benefits Thereafter the article not only summarizes key insights from studies on the management of environmental hydrocarbon pollutants in the past decade thereby compiling recent advances in this field including the involvement of green technologies the most potentially degradable substrates classes of hydrocarbons etc but also circularity in creating a zero waste environment
