developed and developing countries Uniquely it brings together in English the work of leading scholars of the social economy who are also actively engaged in national and international policy formulation Although it argues a case for seeing the social economy as distinctive from the state and market in terms of aims values and actors it also notes many overlaps and complementarities once the economy is conceptualised as a plural entity responding to needs in diverse organisational combinations The book also shows that expectations social and economic cannot be divorced from local institutional and historical circumstances and legacies Accordingly while certain generic policy principles can be shared internationally interventions on the ground cannot ignore the demands of situated practice and legacy **Black Enterprise** ,1995-09
