Preparing for Life in a Digital Age Julian Fraillon,John Ainley,Wolfram Schulz,Tim Friedman,Eveline

Gebhardt, 2014-12-13 Ability to use information and communication technologies ICT is an imperative for effective participation in today's digital age. Schools worldwide are responding to the need to provide young people with that ability. But how effective are they in this regard? The IEA International Computer and Information Literacy Study (ICILS) responded to this question by studying the extent to which young people have developed computer and information literacy (CIL), which is defined as the ability to use computers to investigate, create and communicate with others at home, school, the workplace and in society. The study was conducted under the auspices of the International Association for the Evaluation of Educational Achievement (IEA) and builds on a series of earlier IEA studies focusing on ICT in education. Data were gathered from almost 60 000 Grade 8 students in more than 3 300 schools from 21 education systems. This information was augmented by data from almost 35 000 teachers in those schools and by contextual data collected from school ICT coordinators, school principals and the ICILS national research centers. The IEA ICILS team systematically investigated differences among the participating countries in students' CIL outcomes, how participating countries were providing CIL-related education and how confident teachers were in using ICT in their pedagogical practice. The team also explored differences within and across countries with respect to relationships between CIL education outcomes and student characteristics and school contexts. In general, the study findings presented in this international report challenge the notion of young people as digital natives with a self-developed capacity to use digital technology. The large variations in CIL proficiency within and across the ICILS countries suggest it is naive to expect young people to develop CIL in the absence of coherent learning programs. Findings also indicate that system and school level planning needs to focus on increasing teacher expertise in using ICT for pedagogical purposes if such programs are to have the desired effect. The report furthermore presents an empirically derived scale and description of CIL learning that educational stakeholders can reference when deliberating about CIL education and use to monitor change in CIL over time.

Educational Policy Evaluation through International Comparative Assessments Rolf

Strietholt, Wilfried Bos, Jan-Eric Gustafsson, Monica Rosén, 2014 One of the most salient findings from the field of education is that there are huge national differences in student achievement as shown in international comparative studies like PISA and TIMSS. The shockingly large gap between the highest performing countries, mostly in East Asia, and many European countries corresponds to a difference in attainment of two years of schooling. Although this finding has been replicated in several studies, the reasons for and consequences of such differences are currently not well understood. This book is a collection of essays and studies by leading experts in international comparative education who demonstrate how international comparative assessments can be used to evaluate educational policies. The volume is organized into two parts that address first theoretical foundations and methodological developments in the field of international assessments and second innovative substantive studies that utilize international data for policy evaluation studies. The intention of this book is to revisit the idea of using the world as an educational laboratory both to inform policy and to facilitate theory development.

Prevention

Internet and Smartphone Use-Related Addiction Health Problems Olatz Lopez-Fernandez, 2021-08-31 This Special Issue presents some of the main emerging research on technological topics of health and education approaches to Internet use related problems before and during the beginning of coronavirus disease 2019 COVID 19 The objective is to provide an overview to facilitate a comprehensive and practical approach to these new trends to promote research interventions education and prevention It contains 40 papers four reviews and thirty five empirical papers and an editorial introducing everything in a rapid review format Overall the empirical ones are of a relational type associating specific behavioral addictive problems with individual factors and a few with contextual factors generally in adult populations Many have adapted scales to measure these problems and a few cover experiments and mixed methods studies The reviews tend to be about the concepts and measures of these problems intervention options and prevention In summary it seems that these are a global culture trend impacting health and educational domains Internet use related addiction problems have emerged in almost all societies and strategies to cope with them are under development to offer solutions to these contemporary challenges especially during the pandemic situation that has highlighted the global health problems that we have and how to holistically tackle them

Handbook of Cultural Developmental Science Marc H. Bornstein, 2014-06-03 Researchers and theoreticians commonly acknowledge the profound impact of culture on all aspects of development However many in the field are often unaware of the latest cultural literatures or how development proceeds in places other than their home locations This comprehensive handbook covers all domains of developmental science from a

cultural point of view and in all regions of the globe Part 1 covers domains of development across cultures and Part 2 focuses on development in different places around the world The Handbook documents child and caregiver characteristics associated with cultural variation and it charts relations between cultural and developmental variations in physical mental emotional and social development in children parents and cultural groups This contemporary and scholarly resource of culture in development covers theoretical methodological substantive and ethnic issues as well as geographic approaches Each chapter includes an introduction historical and demographic considerations theory an overview of the most important classical and modern research studies recommended future directions in theory and research and a conclusion The chapters focus on children from the prenatal stage through adolescence Interdisciplinary in nature the Handbook will appeal to human development theoreticians researchers and students in psychology education and pediatrics Ideal for those new to the field readers will appreciate the plethora of cultural examples from all fields of child and human development and developmental examples from all fields of cultural study

The Cambridge Handbook of Motivation and Learning

K. Ann Renninger, Suzanne E. Hidi, 2019-02-14 Written by leading researchers in educational and social psychology learning science and neuroscience this edited volume is suitable for a wide academic readership It gives definitions of key terms related to motivation and learning alongside developed explanations of significant findings in the field It also presents cohesive descriptions concerning how motivation relates to learning and produces a novel and insightful combination of issues and findings from studies of motivation and or learning across the authors collective range of scientific fields The authors provide a variety of perspectives on motivational constructs and their measurement which can be used by multiple and distinct scientific communities both basic and applied

Beyond Assessment of Quality of Life in Schizophrenia

A. George Awad, Lakshmi N.P. Voruganti, 2016-06-14 This book fills a significant research gap in how to integrate quality of life data into relevant clinical care plans and to broaden its applicability to pharmacoeconomic studies of antipsychotic medications and health policy decision making It also presents an argument for reformulating the concept of health related quality of life in schizophrenia as a bio psycho social construct which provides an opportunity to better explore the many factors underpinning the concept itself Internationally renowned experts from different scientific backgrounds and scopes of expertise each make arguments for the need to invigorate quality of life as a concept in schizophrenia by broadening its usefulness for clinical and research efforts The book represents an important addition to the extensive contributions of its editors Dr A George Awad and Dr Lakshmi N P Voruganti to the field of quality of life

A Beginner's Guide to Structural Equation Modeling

Randall E. Schumacker, Richard G. Lomax, 2015-12-22 Noted for its crystal clear explanations this book is considered the most comprehensive introductory text to structural equation modeling SEM Noted for its thorough review of basic concepts and a wide variety of models this book better prepares readers to apply SEM to a variety of research questions Programming details and the use of algebra are kept to a minimum to help readers easily grasp

the concepts so they can conduct their own analysis and critique related research Featuring a greater emphasis on statistical power and model validation than other texts each chapter features key concepts examples from various disciplines tables and figures a summary and exercises Highlights of the extensively revised 4th edition include Uses different SEM software not just Lisrel including Amos EQS LISREL Mplus and R to demonstrate applications Detailed introduction to the statistical methods related to SEM including correlation regression and factor analysis to maximize understanding Chs 1-6 The 5 step approach to modeling data specification identification estimation testing and modification is now covered in more detail and prior to the modeling chapters to provide a more coherent view of how to create models and interpret results ch 7 More discussion of hypothesis testing power sampling effect sizes and model fit critical topics for beginning modelers ch 7 Each model chapter now focuses on one technique to enhance understanding by providing more description assumptions and interpretation of results and an exercise related to analysis and output Chs 8-15 The use of SPSS AMOS diagrams to describe the theoretical models The key features of each of the software packages Ch 1 Guidelines for reporting SEM research Ch 16 www.routledge.com/9781138811935 which provides access to data sets that can be used with any program links to other SEM examples related readings and journal articles and more Reorganized the new edition begins with a more detailed introduction to SEM including the various software packages available followed by chapters on data entry and editing and correlation which is critical to understanding how missing data non normality measurement and restriction of range in scores affects SEM analysis Multiple regression path and factor models are then reviewed and exploratory and confirmatory factor analysis is introduced These chapters demonstrate how observed variables share variance in defining a latent variables and introduce how measurement error can be removed from observed variables Chapter 7 details the 5 SEM modeling steps including model specification identification estimation testing and modification along with a discussion of hypothesis testing and the related issues of power and sample and effect sizes Chapters 8 to 15 provide comprehensive introductions to different SEM models including Multiple Group Second Order CFA Dynamic Factor Multiple Indicator Multiple Cause Mixed Variable and Mixture Multi Level Latent Growth and SEM Interaction Models Each of the 5 SEM modeling steps is explained for each model along with an application Chapter exercises provide practice with and enhance understanding of the analysis of each model The book concludes with a review of SEM guidelines for reporting research Designed for introductory graduate courses in structural equation modeling factor analysis advanced multivariate or applied statistics quantitative techniques or statistics II taught in psychology education business and the social and healthcare sciences this practical book also appeals to researchers in these disciplines Prerequisites include an introduction to intermediate statistics that covers correlation and regression principles

Clinical Psychometrics: Old Issues and New Perspectives Michela Balsamo, Marco Innamorati, Dorian A. Lamis, 2019-09-20 Clinical Psychometrics can be defined as a discipline that deals with the definition and measurement of clinical constructs Among its interests it includes dimensions such as skills behavior

psychopathology quality of life and personality Indeed this discipline focuses on individual differences the theory of measurement the construction of measure instruments and their application in an international context Clinical Psychometrics can be considered as an essential tool in many fields of research related to psychological and psychiatric interventions for example it is useful for diagnostic assessment in various fields including clinical and forensic areas for the design and evaluation of specific psychological and pharmacological treatments Therefore Clinical Psychometrics is an applied discipline using psychometric tools to develop evidence based type procedures relating to the understanding and improvement of the psychological conditions of individuals This Research Topic on Clinical Psychometrics is interested in several aspects of measurement of psychological variables focusing on the two fundamental paradigmatic aspects of the discipline the Classical Test Theory and the Item Response Theory This Research Topic seeks to stimulate a scientific debate between psychotherapists and psychometricians in this area It could have applicative fallouts such as designing trans cultural studies in order to 1 investigate the invariance of new instruments for measuring clinical variables 2 test the invariance of existing instruments used in clinical research 3 develop more refined measure instruments for the evaluation of clinical dimensions similarly to work conducted by the Obsessive Compulsive Cognitions Working Group in identifying domains considered central to OCD and developing the 87 item Obsessive Beliefs Questionnaire 4 evaluate therapeutic outcomes and processes such as states stress psychological distress psychological adjustment to illness health related quality of life mood disorders sexual functioning etc The goal of this Research Topic is to disseminate a culture of integration between psychometric model and clinical model promoting the scientific debate about the deepening of the existing methods and or the proposal of new methods capable of combining clinical significance with quantitative rigor This Research Topic welcomed all types of articles with the exception of case reports We were particularly interested in 1 Systematic reviews shedding new lights on the psychometric properties of the most used psychological measures in clinical psychology neuroscience psychiatry psychosomatics etc 2 Guidelines and suggestions on the correct use and gold standards in psychological assessment in the form of research studies and brief reports on the development of new measures and adaptation of existing ones

Mplus Manual Version 7 Book Review: Unveiling the Magic of Language

In an electronic era where connections and knowledge reign supreme, the enchanting power of language has been apparent than ever. Its power to stir emotions, provoke thought, and instigate transformation is really remarkable.
