A Practical Research Process for Developing a Sustainable Built Environment in Emerging Economies Andrew Ebekozi, Clinton Ohi, Aigbavboa, Wellington Didibhuku Thwala, 2025-02-19 A Practical Research Process for Developing a Sustainable Built Environment in Emerging Economies aims to fill the dearth of practical research guidance and reference material with specific focus on the built environment in developing countries Global policy agendas such as Agenda 2030 the SDGs highlight the importance and growth of research and knowledge from emerging nations who are increasingly contributing to research that is critical for development and advancement The role of built environment practitioners will continue to evolve by building on the sound foundations laid down by the professions and by exploiting to the full the new technologies available to us through conducting innovative research but more guidance on the research process is necessary to ensure the integrity and quality of the output This book has been structured so that each chapter is largely free standing allowing the reader undergraduate postgraduate or practitioner to reference the material with ease It aims to provide

practical guidance on conducting research and on writing a dissertation or report and begins by considering the general research background in a built environment context. It then covers research ethics before moving on to discuss the importance of selecting the right research topic and title and writing a clear abstract. The chapters then cover introducing a research project and the authors include a section on the problem statement, research questions, aims and objectives, research gaps and motivations for the study. The book goes on to cover the literature review, section, theoretical and conceptual frameworks, the various types of methodological approaches and when to apply them. The findings section, discussion of the results and the study's implications are then discussed before the final chapters cover the conclusion and recommendations. The book provides a useful reference for higher education students, graduates, postgraduates and practitioners engaged in all aspects of construction and built environment research.

Corporate Governance and Organisational Performance

Naeem Tabassum, Satwinder Singh, 2020-06-28. Establishing a corporate governance strategy that promotes the efficient use of organisational resources is instrumental in the economic growth of a country as well as the successful management of firms. This book reviews existing literature and identifies board structural features as key variables of an effective corporate governance system, establishing a multi-theoretical model that links Board structural characteristics with firm performance. It then, using a comprehensive empirical study of 265 companies listed on the Karachi Stock exchange, tests this conceptual model. This research serves as a significant milestone reflecting the socio-economic setting of emerging economies and highlighting the need for the corporate sector in emerging markets to move away from a tick box culture. It argues that the sector needs to implement corporate governance as a tool to mitigate business risks, appoint and empower non-executive directors to achieve an effective monitoring of management and establish their own ethical and governance principles applicable to the Board of Directors. Based on an extensive data base collected painstakingly over five years, this book offers new insights and conceptual framework for further research in this area. Given the breadth and width of the research, it is a useful source of future reference for students, researchers and policy makers.

Handbook of Research on Challenges for Human Resource Management in the COVID-19 Era

Figueiredo, Paula Cristina Nunes, Tomé, Eduardo Luís de Campos Soares, Rouco, José Carlos Dias, 2022-06-10. The importance of people in organizations has been growing in the organizational environment over the last decades. Digital transformation, artificial intelligence and sustainability have already reinforced the role of people as a differentiating element for the success and survival of organizations. These phenomena alone are already challenging for people. There is a consensus that the world of work as we knew before the pandemic will not return.
