- Pole Mount Amplifier 2x 70 watts

The PA702 includes a unique (patent pending) mounting system that allows mounting-pole access through the amplifier via a sealed hole incorporated into the chassis design. Simply install the projector mounting pole, align the amplifier chassis hole with the 1.5" mounting tube, & clamp the unit at the desired height above the projector mount with the innovative pole clamp system included with the PA702. Afterwards, install the projector as normal. As a side benefit, the chassis "hole" mounting system provides the necessary security to prevent theft. Output is a strong 70 watts x 2 from the efficient rail tracking Class AB & switch mode power supply technology. Aside from the patent pending chassis design, the PA702, includes a host of other innovative features including an accessory outlet with AC current sense that allows the amplifier to respond instantly from stand-by mode when the projector is powered on. The slim profile chassis is also designed to work in a rack mount configuration. The optional rack mount kit allows single or dual mounting of the PA702 in the 1RU high configuration.
