### DESCRIPTION

The Electro-Voice Model HR9040A is a light weight, all fiberglass, wide-angle high frequency horn that provides extremely precise pattern control over the full frequency range from 400 Hz to 10 kHz. The result of latest research was Model HR9040A, tailored for Electro-Voice's design to be incorporated in its design. An optional joining of hyperbolic reinforcement (throat, input and output flares) provides good low-frequency response coupled with very uniform beamwidth and directivity.

The HR9040A's performance exceeds conventional radiating horn and multi-cellular horns in a number of important areas.

- It does not exhibit midrange (500 Hz to 1.5 kHz) horizontal beamwidth narrowing.
- The vertical high frequency (5.3 kHz to 10 kHz) beamwidth does not narrow with increasing frequency.
- The rated horizontal/vertical beamwidth is maintained to the highest frequencies.
- High frequency polar response is smooth without the characteristic multi-cell ringing.
