The Complete Idiot's Guide to Online Genealogy Rhonda R. McClure, 2002-01-01 A complete guide to researching genealogical questions online explains how to find records by using the Internet how to create a home page for oneself software and hardware needs available genealogical Web sites and more The book covers the basics of both gathering family data and online searches

Twelve Guides to Reliable Electronic Design Gordon G. Johnson, 1955

Terrific Makerspace Projects Juan Denzer, Sharona Ginsberg, 2020-08-12 Terrific Makerspace Projects A Practical Guide for Librarians features fifteen customizable projects that were designed as projects created by librarians makerspace facilitators rather than projects in which librarians guided others makerspace users These projects were showcased during library events with the goal of promoting the makerspace as well as other library services while using them to build connections both within and external to the library This book outlines maker projects in detail and provides plenty of photos and resources so readers can recreate customize and implement them People at all skill levels in every type of makerspace will find something they can try with projects that range from simple and low tech to more complex and tech heavy Most projects are inexpensive taking advantage of free online tools upcycled or repurposed materials and low cost electronics such as Arduinos Each project can be approached as an offering for makerspace visitors or can be created by library employees themselves as tools to engage in outreach and promote the makerspace library services the institution and more Every project has been created and tested in a real library setting by the authors who present lessons learned possible variations and different ideas on how to implement the projects to their fullest extent Explore the idea of using the makerspace to highlight the value of other library services or simply find new and fun ways to engage with your users The book also offers suggestions on how to be a great maker and tips on makerspace safety finding low cost materials and more Whether you re just beginning your makerspace or looking for fresh ideas for your established space this book has something to offer

Exploring the Universe James Dire, 2024-09-26 Have you ever wanted to get better at observing the universe but didn t know where to begin Have you ever wondered what you are looking at in the night sky Whether you are just beginning or an advanced amateur astronomer you will want to have this book in your astronomical library This book wraps up an entire astronomy course around the study of astronomical images all of which have been taken by the author The fascinating images contained herein will inspire readers to explore the descriptions of astronomical objects of all types and the physical processes they undergo throughout the universe The author is both a career astronomy professor and an avid amateur astronomer who owns an arsenal of small telescopes for observing and conducting CCD imaging The author s descriptions are at a level any reader can follow Using his own images mostly taken with smaller telescopes as opposed to Hubble James Webb or multi meter mountain top observatories show amateur astronomers and hobbyists what can be accomplished by using modest and affordable equipment The book begins with a primer on telescopes and the myriad types on the market today You ll read about why there are so many models as well as

the advantages and disadvantages of each This is followed by an introduction to astrophotography a complete description of paper and digital star atlases available today and a discussion on celestial nomenclature why are celestial objects named what they are named You ll learn about light and how it interacts with matter to create what we see in the night sky Finally you ll go on a grand tour of the Universe from the Moon and Sun to comets nebulae star clusters and galaxies Ultraviolet, Visible, and Gravity Astrophysics ,1992 **Image and Graphics Technologies and Applications** Wang Yongtian,Wu Lifang,2023-10-24 This book constitutes the refereed proceedings of the 18th Chinese Conference on Image and Graphics Technologies and Applications IGTA 2023 held in Beijing China during August 17 19 2023 The 35 full papers included in this book were carefully reviewed and selected from 129 submissions They were organized in topical sections as follows image processing and enhancement techniques machine vision and 3D reconstruction image video big data analysis and understanding computer graphics visualization and visual analysis virtual reality and human computer interaction and applications of image and graphics **Scientific and Technical Aerospace Reports** ,1969 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database Commerce Business Daily ,2001 **A Deep Sky Astrophotography Primer** Michael O'Brien,2023-04-19 This instructional guide has one aim to teach inexperienced astrophotographers how to take high quality images Often basic information about astrophotography is lacking or is dealt with too briefly in books on the subject This book is a distillation of the author s own experiences bringing together everything you will need to make the fastest possible progress in deep sky imaging The book will teach you how to set up and use your astrophotography equipment in a systematic easy to follow manner helping you get started while avoiding common mistakes With a step by step walk through course and a unique observational guide to each object the book contains a plethora of valuable beginner friendly information Particularly useful is the chapter on troubleshooting which will help newcomers avoid further frustration when things just don t seem to go right The book also contains a number of easy to advanced DIY projects for imagers working on a budget Dominating The Universe An YeXingMang,2020-02-23 In AD 200 thousand the universe was almost explored and in this vast world there were two types of people who could dominate over others One was the person who had mastered the strongest technology and the other was the person who had reached the peak of the Cultivation Level Family Wu originally had the strongest technological ability recorded in the A I Chip and after obtaining the strongest Cultivation Methods in the world of cultivation what kind of waves would he create in this universe Star to Guide Us Don C.
