Flying in the Face of Criminalization Sofia Michaelides-Mateou,Andreas Mateou,2016-04-15 Two parallel investigations take place after every aviation accident one technical one judicial The former must be conducted with the sole intention of making safety recommendations to prevent the recurrence of similar accidents The judicial investigation however has the intention of identifying those parties that have been at fault and to apportion blameworthiness for criminal and civil liability Consequently this results in a predicament for those parties that have been identified as having played a role in the accident a dilemma between not supplying information aimed at enhancing safety and preventing future accidents and on the other hand supplying such information which may possibly be used against them in subsequent criminal prosecution The situation is compounded by inconsistent approaches between different legal systems aviation professionals may find themselves faced with criminal charges in one country but not in another and they may also be unsure as to whether statements given during the technical investigation could be used against them in a court of law Aviation safety is to a large extent built upon the trust placed by pilots ATCOs and other aviation professionals in the process of accident investigation This book examines the growing trend to criminalize these same people following an accident investigation and considers the implications this has for aviation safety Jane's All the World's Aircraft ,2007 **The AOPA Pilot** ,1987 **The Collaborative Fight** Paul R. Birch,Lina M. Svedin,2024-02-09 The beautiful picture of brothers in arms vanquishing a tyrant The power of a well orchestrated army and navy winning historic battles Overwhelming military might and ability through teamwork This is how the US military services portray themselves to the public and to their own service members through official doctrine However under the veneer of jointness deeply fraught processes are at play Frequently the services think more about protecting organizational turf than about national security and maintaining an advantage against the United States external adversaries Uniting US military services is a difficult endeavor that becomes even more so the farther from a battlefield and the higher up the command structure the unifying needs to happen In *The Collaborative Fight* Paul R Birch and Lina M Svedin examine cases of institutional jointness among US military services from the late nineteenth century into the twenty first century They draw actionable conclusions for practitioners in the defense establishment while giving examples of successful joint cooperation that overcame the difficulties inherent in pursuing it Even the successful cases that Birch and Svedin discuss show that the US military services face bureaucratic incentives and organizational leadership issues that make battlefield cooperation less than ideal Birch and Svedin adeptly translate theory and history into approaches useful to practitioners in the field while examining the theoretical framework outlining the drivers in joint military cooperation
