Armed Forces for the Liberation of Angola Miguel Junior, 2019-12-10 By studying FAPLA we want to make a profound examination on the military edification process from 1976 to 1991. We need to understand the processes of its conversion into a national army and verify the path it has taken during its seventeen years of existence. Thus, the aspects of the edification of FAPLA are a precept, and the references help explain the present. By analysing the process, we learn aspects of the war conduct and see how they made military campaign against armed insurgency. In addition, we created conditions for an in-depth understanding on how Angola prepared itself to face the aggression perpetrated by South Africa and how it was able to obtain supremacy on some fields over the external enemy, as well as allowed us to understand their military misfortunes.

Wearable Systems Based Gait Monitoring and Analysis Shuo Gao, Junliang Chen, Yanning Dai, Boyi Hu, 2022-03-16 Wearable Systems Based Gait Monitoring and Analysis provides a thorough overview of wearable gait monitoring techniques and their use in health analysis. The text starts with an examination of the relationship between the human body's physical condition and gait and then introduces and explains nine mainstream sensing mechanisms including piezoresistive, resistive, capacitive, piezoelectric, inductive, optical, air pressure, EMG, and IMU based architectures. Gait sensor design considerations in terms of geometry and deployment are also introduced. Diverse processing algorithms for manipulating sensors' outputs to transform raw data to understandable gait features are discussed. Furthermore, gait analysis based health monitoring demonstrations are given at the end of this book, including both medical and occupational applications. The book will enable students of biomedical engineering, electrical engineering, signal processing, and ergonomics, and practitioners to understand the medical and occupational applications of engineering based gait analysis and falling injury prevention methods.
