## En Linea Edition 12:

**Perspectives on Universal Logic** J. Y. Beziau, Alexandre Costa-Leite, 2007 *Australia 1901 - 2001* Andrew Tink, 2014-11-01 Andrew Tink's superb book tells the story of Australia in the twentieth century from Federation to the Sydney 2000 Olympics. A century marked by the trauma of war and the despair of the depression balanced by extraordinary achievements in sport, science and the arts. A country underpinned by a political system that worked most of the time and the emergence of a mainly harmonious society. Australians at the start of the century could hardly have imagined the prosperity enjoyed by their diverse countrymen and women one hundred years later. Tink's story is driven by people whether they be prime ministers, soldiers, shopkeepers, singers, footballers or farmers, a mix of men or women, Australian born, immigrants and Aborigines. He brings the decades to life, writing with empathy, humour and insight to create a narrative that is as entertaining as it is illuminating.

**MotorBoating**, 1974-06 **Security in Cyberspace** Giampiero Giacomello, 2014-07-31 Today the Internet has become a source of information that no country or company can forgo. It is not only used to communicate or entertain but most importantly to operate utilities and public services such as banking or air traffic. As the reliance on computer networks across societies and economies keeps growing, so do security risks in cyberspace, referred to as cybersecurity. Cybersecurity means protecting information and control systems from those who seek to compromise them. It also involves actors, both malicious and protective policies, and their societal consequences. This collection of essays provides a better understanding of the risks, perceptions and myths that surround cybersecurity by looking at it from three different levels of analysis: the sovereign state, the infrastructure and stakeholders of the Internet, and the individual. The essays explore such issues as information ownership, censorship, cyberwar, cyberterrorism, privacy and rebellion, bringing together expert knowledge from computer science and the social sciences with case studies. It reviews existing policies and practices and discusses the threats and benefits of living in an increasingly networked world. This authoritative analysis of one of the most controversial and compelling security debates of the twenty-first century will appeal to scholars and practitioners interested in security, international relations and policymaking.

**Repairing the Athlete's Image** Joseph R. Blaney, Lance R. Lippert, Scott J. Smith, 2012-10-05 *Repairing the Athlete's Image: Studies in Sports Image Restoration* edited by Joseph R. Blaney, Lance Lippert and J. Scott Smith offers twenty-one case studies and conceptual frameworks about athletes and their organizations as they attempt to mitigate the effects of malfeasance. Employing traditional Image Restoration Theory (IRT) approaches to athletic communication and other innovative approaches, the contributors to this volume add to our understanding of which communicative strategies work best for athletes when their reputations are sullied. This comprehensive text presents case studies of varying athletes' sports and public relations scenarios with prescriptive advice for those attempting to repair athletic reputations. The contributors variously explore such controversies and mischief as the steroids accusations lobbed at Barry Bonds and Roger Clemens, the Michael Phelps marijuana controversy, the sexual

misconduct of Tiger Woods and Kobe Bryant and other topical subjects in sports communication and image repair While this book will be useful for athletes coaches managers and agents in varying athletic endeavors and levels it is also a dream collection for teachers and scholars of sports communication The subjects examined in this study span country gender and popularity of sport not to mention a healthy variety of types of accusations Repairing the Athlete's Image is an essential resource for graduate and upper level undergraduate courses in sports communication and popular culture

**Critical Practice from Voltaire to Foucault, Eagleton and Beyond** John E. O'Brien, 2013-11-15 Using the historical materialist method to unravel the promise and limits of critical practice since the Revolutionary Age John E. O'Brien investigates the problems and prospects of cultural criticism for the 21st century through absorbing studies of the contested perspectives of Voltaire Friedrich Schiller Jean Baudrillard Michel Foucault Terry Eagleton and Hayden White In spite of recurrent crises due to a flawed Western political economy why is there so much critical intellectual activity with so little effect Framing his study with the early work by Max Horkheimer Luc Boltanski and Teresa Ebert O'Brien's investigation of resistance in America and Europe challenges the bourgeois philosophy of history pointing to the urgency of critique as mode of analysis and intervention

*Liquidity Lost* Paul Langley, 2014-12-12 The interventions of crisis management during the 2007 to 2011 financial crisis were not simply responses to a set of given developments in markets banking or neo liberal capitalism Nor can those interventions be adequately explained as the actions of sovereign state officials and institutions Instead Langley argues processes of crisis governance are shown to have established six principal technical problems to be acted upon liquidity toxicity solvency risk regulation and debt and that the governance of these technical problems is shown to have been strategically assembled in order to secure the continuation of a particular financialized way of life that depends upon global financial circulations Contributing to interdisciplinary debates in cultural economy and the social studies of finance and grounded in extensive empirical research this book offers an innovative analysis of how the contemporary global financial crisis was governed Through an exploration of the interventions made by central banks treasuries and regulatory authorities in the Anglo American heartland of the crisis between 2007 and 2011 experimental and strategic apparatuses of crisis governance are shown to have emerged These discrete apparatuses established the six technical problems to be acted upon but also shared certain proclivities and preferences Crisis governance assembled discourses and devices of economy in relation with sovereign monetary fiscal and regulatory techniques and elicited an affective atmosphere of confidence It also sought to secure the financialized way of life which turns on the opportunities ostensibly afforded by uncertain financial circulations and gave rise to post crisis technical fixes designed to advance the resilience of banking and the macro prudential regulation of financial stability Thus the consensus that prevails across economics political economy and beyond wherein sovereign state institutions are cast as coming to the rescue of the markets banking or neo liberal capitalism conceals a great deal more than it reveals about the governance of the global financial crisis
