change and loss of biodiversity species identification has never been more important The fourth edition of Light and Smith is more than just a field guide it is a masterwork of research and description with a strong focus on morphological detail No other book has such a broad scope newly expanded to include even the most obscure taxa The revised keys and beautiful anatomical illustrations make this classic guide more indispensable than ever As taxonomists become extinct there are fewer students to receive the vast body of knowledge accumulated by generations of careful study I hope that the beauty and depth of this guide will inspire a generation of young scientists to continue this critical taxonomic work It will have a place of honor in all marine labs Paul K Dayton Scripps Institution of Oceanography
